TEMPLE UNIVERSITY HOSPITAL

2016 COMMUNITY HEALTH NEEDS ASSESSMENT

I. INTRODUCTION TO ASSESSMENT

The **purpose** of the needs assessment is to **identify and prioritize community health needs** so that the hospital can develop strategies and implementation plans that benefit the public as well as satisfy the requirements of the Affordable Care Act.

ABOUT TEMPLE UNIVERSITY HOSPITAL

The Temple University Health System is dedicated to providing access to comprehensive primary and specialty quality patient care through population health, linked to academic excellence in medical education and research.

As the chief academic teaching hospital of the Lewis Katz School of Medicine of Temple University, Temple University Hospital (TUH) is a 722-bed non-profit acute care hospital that provides a comprehensive range of medical services to its low-income communities, and a broad spectrum of secondary, tertiary, and quaternary care to patients throughout Southeastern Pennsylvania and beyond. TUH is accredited as an Adult Level 1 Trauma Center by the Pennsylvania Trauma Systems Foundation.

In addition to its main campus in North Philadelphia, TUH includes its Episcopal and Northeastern campuses, both of which are in economically distressed areas within three miles of the TUH main and medical school campus.

As our chief clinical teaching site, TUH is staffed by over 400 physicians of Temple University Physicians (TUP), our faculty-based practice plan, as well as physician scientists from our affiliated Fox Chase Cancer Center and our community-based Temple Physicians, Inc. (TPI). Temple physicians represent 17 academic departments including subspecialties in emergency medicine, oncology, gastroenterology, obstetrics, gynecology, orthopedics, neurosurgery, neurology, general and specialty surgery and psychiatry.

Temple physicians also staff important clinics that address major public health concerns, such as the Comprehensive NeuroAIDS Center at Temple University, which is dedicated to improving the public health impact of bench-to clinic research associated with HIV-induced neurological diseases and cognitive disorders.

Temple's nationally renowned physicians offer state of the art treatment options for patients with complex medical problems, some of whom were previously considered untreatable. Using sophisticated technologies and personalized treatments, Temple physicians are working to alter the course of serious disease. In over a dozen research centers, our faculty is speeding the transformation of fundamental scientific discoveries into practical therapies that may one day dramatically improve human health.

The Fox Chase-Temple Bone Marrow Transplant Program, a formal affiliation between Fox Chase Cancer Center and TUH, is an example of this type of transformative medicine. Since its inception in 1988, the program has performed over 1,500 transplants, and has participated in countless research studies to promote life-saving treatment modalities.

In addition to the academic mission, The Temple Center for Population Health, LLC, (TCPH) was established in 2014 to promote and support the population health efforts of TUH and North Philadelphia. We align our efforts with the goals of the United States Department of Health and Human Services' three-part aim of achieving better care for patients, better health for our communities, and lower costs through health care system improvement.

The TCPH mission is to attain a sustainable model of health care delivery through clinical and business integration, community engagement, and academic distinction to promote healthy populations. The TCPH includes an extensive network of Patient Centered Medical Homes; chronic disease management programs for high risk populations utilizing nurse navigators; an extensive inpatient and outpatient community health worker program, peer coaching, and a central access center utilized for appointment scheduling and acute care follow-up. The TCPH ambulatory performance improvement platform has been established to provide the infrastructure on which outpatient clinics can continue to achieve better care, smarter spending and healthier communities. The TCPH collaborates with TUH to assure smooth transitions of care, access to community resources and management of value-based purchasing.

All Temple physicians, whether faculty or community based, care for patients covered by Medicaid in both the inpatient and outpatient setting. About 84% of our inpatients are covered by government programs: 38% by Medicare and 46% by Medicaid. Patients dually eligible for both Medicare and Medicaid comprise about 20% of our Medicare inpatient base. Approximately 42% of our total inpatient cases include a behavioral health diagnosis.

TUH also serves as a critical access point for vital public health services. Last year we handled more than 134,000 patients in our Emergency Department; 10,600 patients in our Psychiatric Crisis Response Center; 2,400 discharges from our inpatient Behavioral Health unit; 541 victims of gun and stab violence in our Trauma Unit, the highest number in Pennsylvania; and more than 230 patients in our Burn Center. We performed 246 transplants. We delivered about 2,900 babies, of whom 88% were covered by Medicaid.

TUH is located in a federally designated *Medically Underserved Area*. Within our service area, about 30% of individuals live below the federal poverty level; about 64% have achieved a high school education level or less; about 47% of individuals identify as Black, 24% as Hispanic, 21% as White; 6% as Asian & Pacific, and 2% as other.

The Temple University Health System includes Jeanes Hospital and the Fox Chase Cancer Center, which includes American Oncologic Hospital, also known as the Hospital of the Fox Chase Cancer Center; the Institute for Cancer Research; and the Fox Chase Cancer Center Medical Group,

PURPOSE

This report summarizes the results of an assessment of the health status and unmet health care needs of residents of Temple University Hospital's service area.

The purpose of this needs assessment is to identify and prioritize community health needs so that the hospital can develop strategies and implementation plans that benefit the public, as well as satisfy the requirements of the Affordable Care Act. The needs assessment was conducted by Public Health Management Corporation (PHMC), a private non-profit public health institute.

This Assessment section includes:

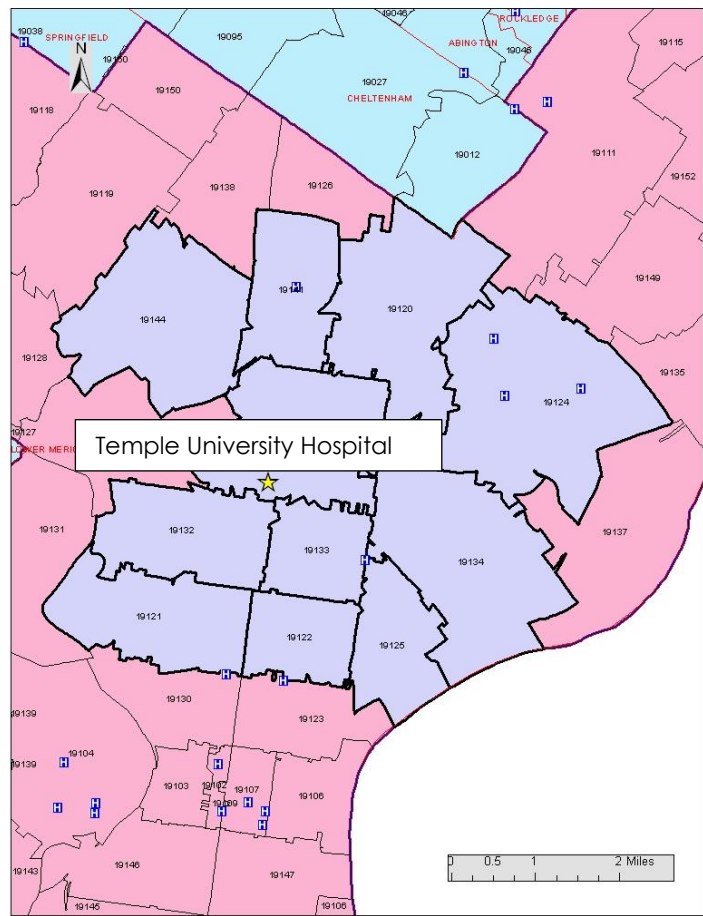

- a definition of the community assessed in the report;
- a description of the previous needs assessment; and
- the qualifications of PHMC to conduct the assessment.

COMMUNITY DEFINITION

The community (2015 Pop. 633,031) for purposes of this needs assessment was defined as the Zip codes where **75% of Temple University Hospital's inpatient admissions derive.**

For purposes of the Temple University Hospital Community Health Needs Assessment, TUH's service area includes the following zip codes in the City of Philadelphia: 19111, 19120, 19121, 19122, 19124, 19125, 19132, 19133, 19134, 19138, 19140, 19141, 19144, and 19149. This service area comprises the zip codes in which 75% of inpatients discharged from Temple University Hospital reside.

Map1. Temple University Hospital Service Area

PREVIOUS NEEDS ASSESSMENT

In 2013, Temple University Hospital, through Temple University Health System, worked with PHMC to complete a community health needs assessment to identify and prioritize the hospital community's unmet health needs. The community's unmet health care needs were identified based on the analysis of the data and community input.

As indicated in the 2013 assessment, findings from the Southeastern Pennsylvania Household Health Survey were significantly ($p \leq .05$) worse for the TUH service area in the following areas:

- Percentage of uninsured adults and adults without prescription drug coverage;
- Overweight and obese adults and children;
- Cigarette smoking and problem drinking among adults;
- Adults and older adults in fair or poor health and with asthma, diabetes, and high blood pressure; and
- Dental visits among children.

Analysis of quantitative and qualitative data also shows that the unmet health care needs of residents in the TUH service area included the following prioritized needs:

- Access to primary and preventive care for adults and children, particularly those children living in poverty, and who are uninsured or under-insured;
- Access to dental care, prescription coverage for adults and children; and
- Mental health services for women and adults.

Priority unmet needs in the TUH service area also included increased educational programs to address:

- Cultural or language barriers, particularly among non-English speakers;
- Heart disease and cancer management;
- Smoking prevention, interventions, and cessation programs;
- Overweight and obese children and adults;
- Access to low-cost health insurance; and
- Health education about healthy lifestyles and disease management.

As indicated in the 2013 assessment, many of these unmet needs are already being addressed in the service area by TUH, other healthcare providers, government, and local non-profits. Some areas of unmet needs, however, are not within TUH's mission.

Additionally, some of the needs pertaining to the social determinants of health are not within the scope of services of TUH.

Through a consensus-building process that included leaders of Temple University Hospital and its affiliated Jeanes Hospital and the Hospital of the Fox Chase Cancer Center, all hospitals determined their areas of focus through which they develop initiatives to address unmet needs. TUH considered whether an issue is the root cause of other problems, internal resources of each hospital, external resources in the community, academic resources of Temple University, the community's ability to respond to the issues, and the consequences of not responding to an issue.

As a result of this process, TUH has developed comprehensive plans to address many of these needs as part of its efforts to improve the health of its vulnerable population. In some cases, it was determined that TUH does not have sufficient resources to address certain unmet needs as an area of high priority. In such cases, however, TUH will continue to work in appropriate partnership with other community based organizations and governments agencies, as well as with Temple University and other members of the Temple Health family, to strengthen access to these programs and enhance the health and quality of living in the communities we serve.

The next section identifies the areas that were prioritized, and the progress toward improving the health of TUH's community.

IMPACT OF THE 2013 NEEDS ASSESSMENT

Community Benefit Implementation Plan Temple University Hospital Summary of Progress for the Period July 1, 2014 through June 30, 2015

Based on its Community Health Needs Assessment of April 2013, TUH established the following priority areas to improve the health of its communities: (1) improve the health of moms and newborns; (2) address the dangers of obesity and overweight BMI; (3) improve heart and vascular health; (4) improve access to mental health resources; (5) strengthen awareness of gun violence; and (6) strengthen practices for providing culturally competent care. Summarized below are the outcomes we achieved in these areas.

Improve the Health of Moms and Newborns. In furtherance of our goal to reduce the incidence of infant mortality and improve access to community resources for mothers and newborns, we achieved the following outcomes:

- Established a community health worker role within the Temple obstetrics practice focused on assisting women with a high probability of delivering a high-risk infant.
- Awarded a Kellogg Foundation planning grant to develop a comprehensive program inclusive of lactation, care coordination and post-discharge follow-up.
- Developed an Infant Safe Sleep Program including a research study, patient and family education, and a “Baby Box”.
- As a key strategy in improving compliance with prenatal care, established a comprehensive coordinated approach to Prenatal Care & Education. Distributed *Collective* Prenatal education materials in all prenatal practices that deliver at TUH.
- Awarded an “EMPower Grant - Enhancing Maternity Practices -Breastfeeding” to support advancement of breast feeding education of patients, financial support for all phases of Baby Friendly Designation Application, and ongoing education of hospital personnel.
- Established a database to gain understanding of nutrition options. Working with USDA Women, Infants & Children Food & Nutrition Program (WIC) and City Health Centers and farm-to families to improve access to nutritional foods and to educate families.
- Developed smoking cessation awareness and education program. In partnership with the City of Philadelphia, we are exploring a community resource access plan.

- Established a doula program in collaboration with the Maternity Care Coalition and Kellogg Foundation.
- Continue our support of the City of Philadelphia MOM program, which connects mothers and babies from birth through age 5 with social, educational, and healthcare supports.

Address the Dangers of Obesity and Overweight BMI. In furtherance of our goal to improve general knowledge of healthy food choices and identify resources to aid in nutrition education, we achieved the following outcomes.

- Established a hospital/community workgroup to identify methods to establish a healthy choice nutrition platform, including the City of Philadelphia and Common Market.
- Developed a collaborative relationship with the Philadelphia Department of Public Health's Catherine Bartoli, who is leading a research initiative related to Healthy Foods in hospitals.
- Established a biweekly delivery by Common Market for our TUH employees to encourage healthy choices.
- Created a coordinated program between the nutrition department and the cafeteria to establish healthy menu choices with information on caloric/fat content in the hospital cafeteria.
- In collaboration with City of Philadelphia, Department of Public Health, participated in an independent cafeteria assessment to improve healthy choices as well as the Healthy Foods, Healthy Hospital Program
- Initiated a comprehensive list of nutritional resources and offerings for our community.
- Community based program completed with nutritional content, and "Brown Bag" ingredients for each participant.
- Maintained ongoing education programs related to diabetes and heart healthy focus. For example, an additional Dining with Diabetes series was added in spring 2015.
- Initiated a new integrated television system linked to patient education on nutrition.

Improve Heart and Vascular Health. In furtherance of our goal of improving the heart and vascular health of our communities by strengthening access to hospital and community based services, we achieved the following outcomes:

- Community Health Workers conducted interventions with 750 patients.
- Community Health Workers accompanied 851 patients to doctor's appointments.

- Community Health Workers have assisted in scheduling 848 visits - both new and follow up.
- Community Health Workers have completed over 200 home visits.
- Reduced 30-day readmissions to the hospital (as reported by two of our health insurers) since the Community Health Workers' Program was initiated.

Improve Access to Mental Health Resources. In furtherance of this goal, we achieved the following outcomes:

- Created a Consumer Mental Health Resource Manual.
- Translated the Consumer Mental Health Resource Manual into Spanish.
- Distributed the Consumer Mental Health Resource Manual to social work and clinical staff in the Temple University Health System hospitals and also to social work staff at other area hospitals. This resource manual is being used at:
 - TUH-Episcopal Campus Crisis Response Center;
 - Episcopal Behavioral Health Inpatient units;
 - Social Work staff at TUH;
 - Community Health Workers at TUH; and
 - Emergency Department and Social Work staff at TUH, Jeanes, Aria-Frankford, Torresdale and Bucks County Hospital, Nazareth Hospital, and Holy Redeemer Hospital.
- Provided training on mental health resources to Community Health Workers and Residence Hall coordinators for Temple University.
- Provided Consumer Mental Health Resource Manuals and training for the staff of the *Temple Health: Block by Block* Initiative, which connects community members with research studies and health programs at Temple University. This is a partnership between Temple Health and local residents that aims to better understand and address the health concerns and needs of communities in the North Philadelphia area.
- Participated in three health fairs and community education projects which served more than 1,000 participants.

Strengthen Awareness of Gun Violence. In furtherance of our goal of strengthening awareness of the dangers of gun violence to reduce hospitalizations, reduce barriers to preventive health care, and to improve the quality of living in our underserved community, we achieved the following outcomes:

- Delivered our Cradle to Grave (C2G) program presentation to more than 1,300 Philadelphia residents, a significant number of whom were at-risk youth residing in North Philadelphia.

- C2G delivered a series of presentations modified for young offenders being detained at the Philadelphia Juvenile Justice Center. These presentations were given to more than 300 individuals through the facilities school program.
- C2G completed development of its program "Bullets and Bodies," working with a medical illustrator from the University of Illinois at Chicago. This program uses computer based instruction to enhance participants' understanding of human physiology and gun-related injury.
- Trauma staff completed development of Project Fighting Chance, a community-based first-aid curriculum adapted from the Department of Defense's tactical Combat Casualty Training.
- Emergency Department nursing personnel were recruited to facilitate Project Fighting Chance with residents of communities with high rates of injury.

Strengthen practices for providing culturally competent care. In furtherance of this goal, we achieved the following outcomes:

- Presented our Cultural Competency Symposium to over 130 staff and physicians of Temple Health, concentrating on health disparities among African Americans.
- Provided a fact sheet to participants on cultural issues of African Americans.
- Conducted assessment surveys with staff about the use of interpreters for our limited English proficient patients and the hard of hearing/deaf patients.
- Conducted medical records reviews of documentation about the use of interpreters.
- Obtained additional equipment for the hard of hearing patients.

This section is followed by III. Community Demographics; IV. Health of the Community; V. Access to Care; VI. Health Behaviors; VII. Special Populations; VIII. Existing Resources; and IX. Social Determinants of Health and Unmet Needs. Tables are included in the Appendices

II. PROCESS AND METHODS

PHMC applied the following five steps in conducting the needs assessment process:

- defining the community;
- identifying existing primary and secondary data and data needs;
- collecting primary and secondary data;
- analyzing data; and
- preparing a written narrative report.

To assist TUH in further targeting community health needs, PHMC provided additional hospital and geographic specific data in the Appendices to this report.

The data acquisition and analysis, community representatives, and information gaps are described in more detail below.

DATA ACQUISITION AND ANALYSIS

Both primary and secondary and quantitative and qualitative data were obtained and analyzed for this needs assessment.

Obtaining information from multiple sources, known as triangulation, helps provide context for information and allows researchers to identify results which are consistent across more than one data source.

Quantitative information. We obtained this information from the following sources:

- the 2013 American Community Survey, and 2015 and 2020 Nielsen-Claritas Pop-Facts;
- Pennsylvania Health Department vital statistics on births, deaths, communicable diseases, and cancer incidence (2008-2012 and 2009-2012); and
- PHMC's 2015 Southeastern Pennsylvania Household Health Survey.

These data were analyzed for the hospitals' service area using the Statistical Program for Social Sciences (SPSS).

Frequency distributions were produced for variables for multiple years of data, so trends over time could be identified and described. Also, for Household Health Survey measures, tests of significance were conducted comparing the service area to Southeastern Pennsylvania to objectively identify and prioritize unmet needs.

In addition, quantitative data for each service area from the Household Health Survey was compared to health objectives for the United States from Healthy People (HP) 2020, and to data collected for Pennsylvania from the Center for Communicable Diseases' 2014 Behavioral Risk Factor Surveillance Survey.

Qualitative information: PHMC also collaborated with TUH to identify individuals living and/or working in the communities in the hospital's service area who could provide input on the needs assessment as community members, public health experts, and as leaders or persons with knowledge of underserved racial minorities, low income residents, and/or the chronically ill. TUH and PHMC worked together to obtain meeting venues, contact potential participants, and encourage attendance. Meeting participants were not compensated.

Participants who could not attend were invited to send written comments, and these were incorporated into the report. Input from the community meeting participants, including county and local health department officials and public health experts, was used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs. Qualitative information from the community meetings was analyzed by identifying and coding themes common to participants, and also themes that were unique. This information was organized into major topic areas related to health status, access to care, special populations, and unmet needs.

These data sources are described in more detail in the next section.

The information from this needs assessment will be used by the hospital to develop a community health implementation plan.

PHMC SOUTHEASTERN PENNSYLVANIA HOUSEHOLD HEALTH SURVEY

A total of **1,517 interviews were conducted with adults** residing in the hospital's service area, including 435 adults age 60 and over and 454 households with a selected child under the age of 18.

Temple University Hospital (TUH) received input on the needs of the community, including the medically underserved, low-income, and minority populations from PHMC's 2015 Southeastern Pennsylvania Household Health Survey. The survey questionnaire examines health status and utilization of, and access to, health care among adults and children in the five-county area of Bucks, Chester, Delaware, and Montgomery Counties and the City of Philadelphia.

The survey was conducted through telephone interviews with people 18 years of age and older living in 10,018 households in Southeastern Pennsylvania. Of this total sample of 10,018 adults, 1,517 adult survey respondents lived in TUH's service area and participated in the survey. These 1,517 households also included 435 adults age 60 and over and 454 households with at least one child under the age of 18.

A total of 2,009 cell phone interviews were conducted with adults in the five county area. Cell phone respondents received the same survey questionnaire as landline respondents.

The survey includes many questions that have been administered and tested in national and local health surveys:

- National Center for Health Statistics (NCHS) for the National Health Interview Survey (NHIS);
- The Behavioral Risk Factor Surveillance Survey (BRFSS);
- The California Women's Health Survey;
- The Social Capital Community Benchmark Survey (Kennedy School of Government, Harvard University); and
- The Survey on Childhood Obesity (Kaiser Family Foundation/San Jose Mercury News).

Households in each of the five counties were selected to guarantee representation from all geographic areas and from all population subgroups. When needed, the interviews were conducted in Spanish.

The survey was administered for PHMC by Abt/SRBI, Inc., a research firm in New York City, between December 2014 and March 2015.

The final sample of interviews is representative of the population in each of the five counties so that the results can be generalized to the populations of these counties.

Within each selected household with more than one eligible adult, the Last Birthday Method was used to select the adult who last had a birthday as the respondent for the interview (with the exception of the cell phone sample). In households with children, the child under age 18 who most recently had a birthday was selected as the subject of the child interview. The survey incorporates over-samples of people ages 60-74 and 75 and older to provide a sufficient number of interviews for separate analyses of the responses of people in these subgroups.

Information from the survey was analyzed for the community as a whole and for the uninsured, medically underserved, poor, ethnic and racial minorities, children, and older adults. The results of the survey were taken into account in identifying the size and location of these medically underserved populations, their unmet health care needs, and any barriers they encounter to accessing services. Priorities among these needs were established by comparing the results of the 2015 HHS to Health People 2020 benchmarks, existing resources, and the hospital's existing programs and mission.

U.S. CENSUS

This report includes data on the characteristics of the hospital's service area residents and residents of Montgomery County and Philadelphia for the years 2013, 2015 and 2020. Data from the 2010 U.S. Census, estimates from the 2013 and 2015 American Community Survey, and the Nielsen-Claritas Pop-Facts Database projections for 2020 were also used. The Nielsen-Claritas Pop-Facts Database uses an internal methodology to calculate and project socio-demographic and socioeconomic characteristics for non-census years, relying on the U.S. Census, the Current Population Survey, and the American Community Survey.

VITAL STATISTICS

The most recent information on births, birth outcomes, deaths, cancer, and reportable diseases and conditions for residents of TUH's service area and for Montgomery County and the City of Philadelphia was obtained from the Pennsylvania Department of Health, Bureau of Health Statistics and Research.

Five year (2009-2012) annualized average rates for natality and four year (2008-2012) annualized average rates for mortality and cancer incidence were calculated by PHMC. Mortality rates were age-adjusted using the Direct Method and the 2000 U.S. standard million population.

The denominators for all 2008-2012 and 2009-2012 vital statistics rates for the city, county, and state were interpolated from the 2010 U.S. Census and the 2015 American Community Survey. The number of women age 15-44 and age 15-17 was also interpolated from the 2010 US Census and 2015 American Community Survey.

2015 COUNTY HEALTH RANKINGS AND ROADMAPS

The *County Health Rankings* measure the health of nearly all counties in the nation and rank them within states. The *Rankings* are compiled using county-level measures from a variety of national and state data sources. These measures are standardized and combined using scientifically-informed weights.

COMMUNITY MEETINGS AND INTERVIEWS

The hospital solicited and took into account input from persons or organizations that represent the broad interests of the community it serves, including:

- Local city and county health departments in SEPA;
- Members and/or representatives of medically underserved, low-income, and minority populations; and
- Written comments received on the most recent service and Implementation Strategy.

TUH solicited and took into account input from persons or organizations that represent the broad interests of the community it serves. In general, input was received on the unmet health care needs, existing health care resources, and special needs of minority and medically underserved populations. The community meeting was guided by a set of written questions that focused on participants' perceptions of the most important physical and behavioral health problems in the area, programs that successfully address these issues, gaps in services, barriers to care, vulnerable and underserved populations, and how to best reach individuals in the community.

This input was solicited from 26 community representatives of the medically underserved, low-income, and minority populations in the service area and from the Deputy Health Commissioner of the Philadelphia Department of Public Health. A total

of 76 potential participants for the meetings were identified by TUH staff working with PHMC, and invited to attend the meeting.

The input was received at the community meeting held at TUH's main campus on November 3, 2015, at a separate community meeting held at TUH's Episcopal Campus on November 18th, and in an interview with the Deputy Health Commissioner of the Philadelphia Department of Public Health on September 8, 2015. Anyone who could not attend was invited to send written comments at any time.

The community members attending the meeting represented the organizations listed below, and included local government, public health experts, and members and representatives of medically underserved, low-income, and minority populations.

Organizations representing medically underserved, low income and minority populations:

Art Sanctuary
Tioga United
Presbyterian Inspired Life
Mercy Neighborhood Ministries of Philadelphia, Inc. (2)
Shriners Hospital for Children - Philadelphia (3)
Local Initiatives Support Corp. (2)
Asociación Puertoriquenos en Marcha
Temple University Hospital (7)
Temple University Health System
YMCA Columbia North
Public Citizens for Children and Youth
Help U.S.A.
Zion Baptist Church, Mexican Medical Clinic
Catholic Social Services/Casa del Carmen (2)
Impact Services Corp.
New Kensington Community Development Corporation
El Congreso de los Latinos Unidos
Prevention Point Philadelphia
Hispanic Alliance for Career Enhancement
Nueva Esperanza, Inc. (2)
Allegheny West Community Development Corporation

Government Agencies

Mayor's Office of Community Services

City of Philadelphia Office of Community Behavioral Health

The input from this meeting is summarized in each section of this report, as pertinent.

INFORMATION GAPS

Quantitative information for socioeconomic and demographic information, vital statistics, and health data was available at the ZIP code level for the service area. To fill potential gaps in information, these data were supplemented by detailed information about the service area obtained from community meetings.

III. COMMUNITY DEMOGRAPHICS

POPULATION SIZE

The population of the Temple University Hospital (TUH) service area is 633,031. It was 628,722 in 2013 and is predicted to increase to 645,035 in 2020. This represents almost a 3% population increase since 2013.

AGE

In the TUH service area, 18-44 year olds make up 39% of the population (248,968); the size of this age group is predicted to remain stable into 2020.

- The 18-44 year old group in Philadelphia as a whole (41%) makes up a slightly larger percentage of the City's population, and is predicted to decline by from 41% to 40% by 2020.
- The percentage of individuals in this age group in Montgomery County (33%) is smaller than in the TUH service area (39%) and in Philadelphia (41%), with a similar growth trend predicted.

Figure 1. Age Distribution of the Population, 2015

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

Twenty-seven percent of TUH service area residents (169,735) are children between the ages of 0-17.

- Children in the service area (27%) make up a larger percentage of the population compared to Philadelphia (23%) and Montgomery County.

Twenty-three percent of the TUH service area residents are age 45-64 (147,546).

- This percentage has not changed since 2013, but by 2020 is predicted to decrease to almost 22%.

Older adults age 65+ (66,782) make up 11% of the population. This is the only age group in the TUH service area which is predicted to increase slightly to 12% or 13% in the next five years.

- The TUH service area (11%) has a smaller percentage of 65+ residents than Philadelphia (13%) and Montgomery County (17%).

The population growth pattern in the TUH service area is similar to the pattern in Philadelphia and Montgomery County overall.

RACE/ETHNICITY

Slightly less than one-half of TUH service area residents (47%) are Black.

- Nearly one-quarter (24%) of the population is Latino, 21% is White, and 6% is Asian.
- This pattern is slightly different than the racial/ethnic pattern in Philadelphia as a whole, where 41% of the population is Black, 36% White, 14% Latino, and 7% Asian.

The racial/ethnic pattern is very different in Montgomery County, where 77% of the population is White, 9% is Black, 7% is Asian and 5% is Latino.

Figure 2. Race and Ethnicity, 2015

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

LANGUAGE SPOKEN AT HOME

The majority of residents within the TUH service area (72%) speak English at home.

- However, the TUH service area (72%) has a lower percentage of residents who speak English at home than Philadelphia (79%) and Montgomery County (87%).

Nineteen percent of service area residents speak Spanish at home, 4% speak an Asian language, and 5% speak another language.

- The TUH service area (19%) has almost twice as many residents who speak Spanish at home as Philadelphia overall (10%), and more than six times the percentage of residents who speak Spanish than Montgomery County (19% versus 3%).

SOCIOECONOMIC INDICATORS

EDUCATION

The majority of TUH service residents age 25+ (62%) are high school graduates; an additional 13% have a college degree or more.

- More than one-quarter of the population age 25+ (26%) did not graduate from high school.
- The TUH service area (26%) has a higher percentage of residents with less than a high school degree than Philadelphia (20%) and Montgomery County (7%).

Figure 3. Educational Attainment of Adults 25+, 2015

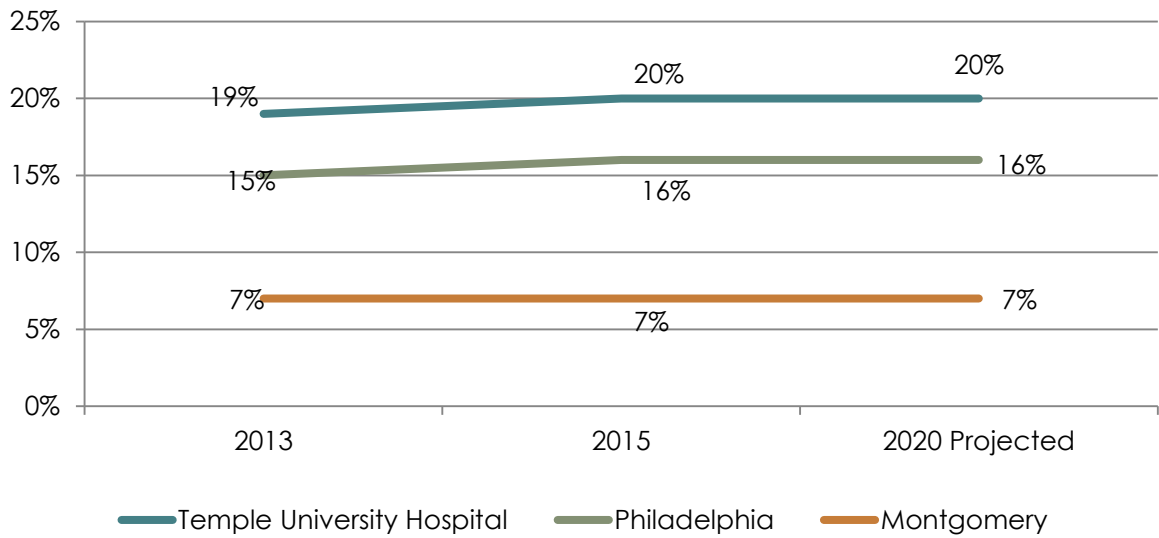

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

EMPLOYMENT

The majority of residents age 16 and over in the TUH service area (80%) are employed; the unemployment rate is 20%.

- Unemployment (20%) is higher in the TUH service area than in Philadelphia (16%) and Montgomery County (7%).

Figure 4. Unemployment, Residents 16+, 2013, 2015, and 2020

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

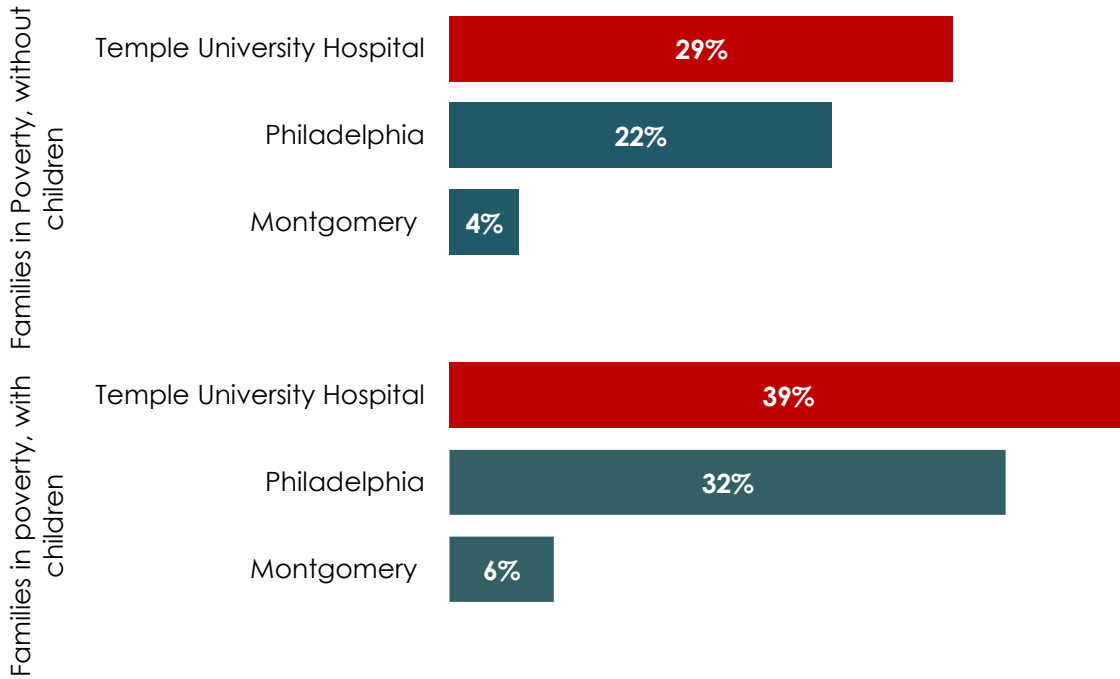

POVERTY STATUS

More than two-thirds of families in the TUH service area are living in poverty.

- Thirty-nine percent of families with children, and 29% of families without children, in the TUH service area are living in households with incomes that are below the federal poverty level.

Poverty rates are higher in the TUH service area compared to rates in Philadelphia (32% of families with children and 22% of families without children live in poverty) and Montgomery County (6% of families with children and 4% of families without children live in poverty).

Figure 5. Families in Poverty, 2015

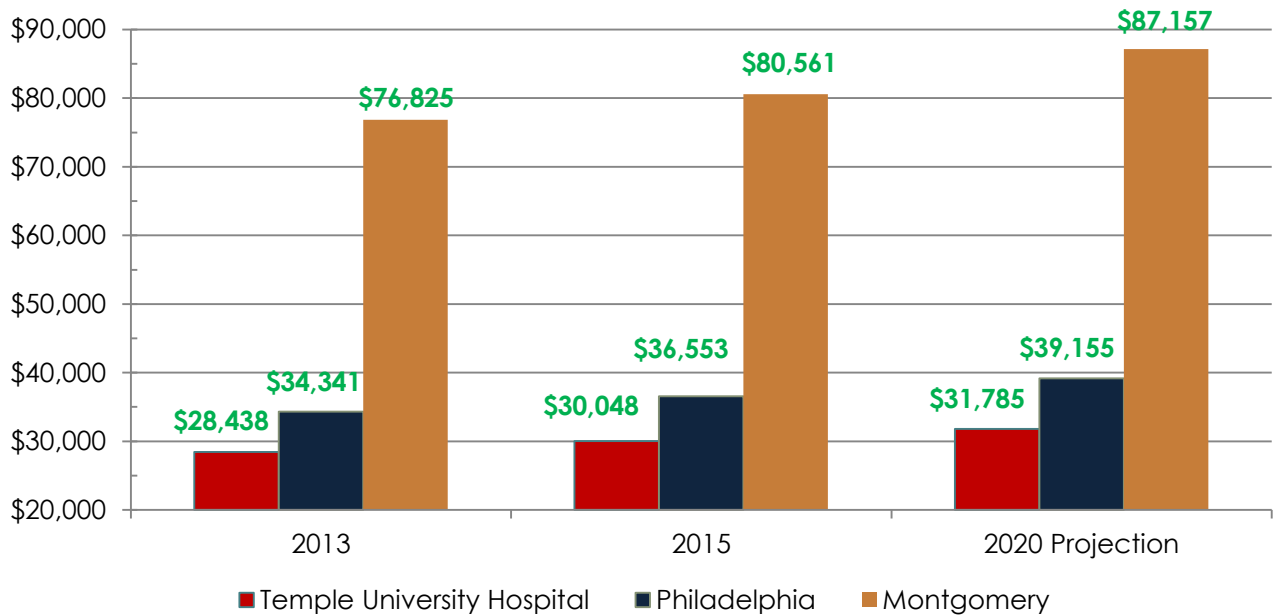

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

MEDIAN HOUSEHOLD INCOME

The median household income in the TUH service area is \$30,048. This represents a minimal increase from 2013 when it was \$28,438. It is predicted to grow slightly to \$31,785 by 2020.

- The median household income in the TUH service area (\$30,048) is lower than the median household income in Philadelphia (\$36,553), and much lower than the median household income in Montgomery County (\$80,561).

Figure 6. Median Household Income 2013, 2015, and 2020.

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

HOME OWNERSHIP

The majority of TUH service area residents (54%) own their homes, and 46% rent.

- This is similar to home ownership rates in Philadelphia, where 54% of residents own their home and 46% rent.
- The percentage of home owners is higher in Montgomery County, where 73% of residents own their home and 27% rent.

Figure 7. Home Ownership, 2015

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S.Census

IV. HEALTH OF THE COMMUNITY

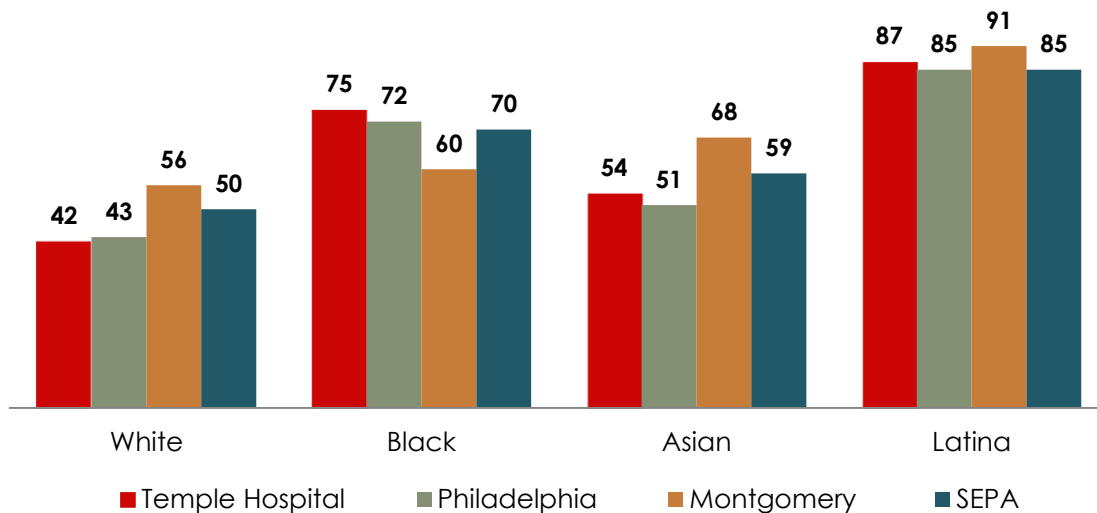

As stated by representatives at Philadelphia Dept. of Public Health: “ The most serious health problems from a PDPH perspective are: 1) the health of women and infants; 2) safe sex and reproductive health for teenagers; 3) chronic disease, including causes such as smoking, poor diet, and lack of physical activity; and 4) indoor and outdoor environmental issues that impact health.”

FERTILITY RATES

There is an average of 10,788 births annually to women living in the TUH service area.

- This represents a fertility rate of 73 live births per 1,000 women age 15-44, a higher rate than in Philadelphia (64), Montgomery County (60), and SEPA (60).

Figure 8. Fertility Rates of Women Aged 15-44, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. 2010 U.S. Census. Calculations prepared by PHMC.

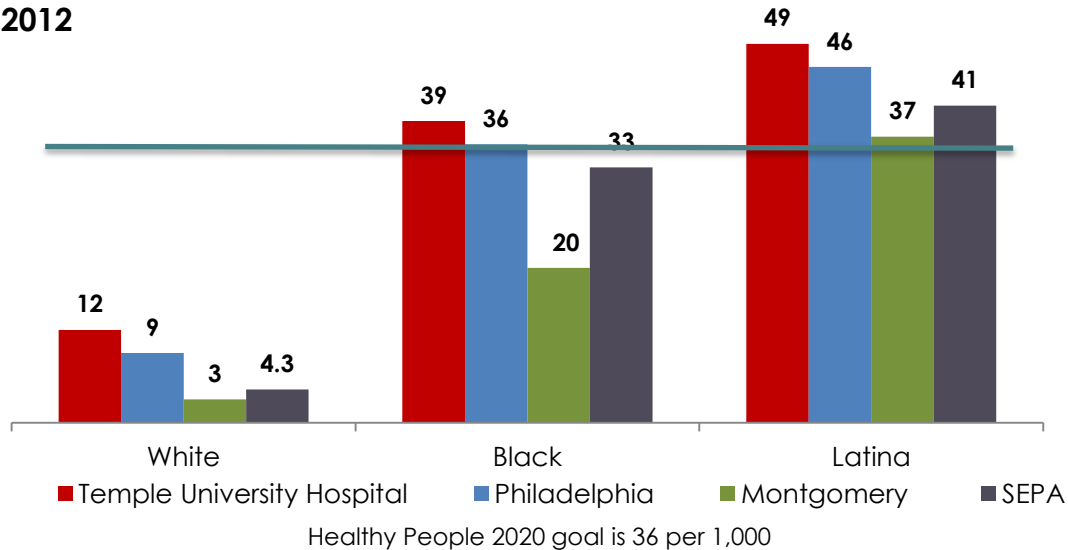

Latina women have the highest fertility rate in the service area (87; 2,967), followed by Black women (75; 5,518) and Asian women (54; 436).

- White women have the lowest fertility rate in the TUH service area (42; 1,714).

Infants born to teenagers have been associated with a number of negative birth outcomes, including prematurity and low birth weight, making it an important outcome to track.

In the TUH service area, the fertility rate among adolescent women age 15-17 is 38 per 1,000, representing an average of 585 births annually. This exceeds the HP 2020 goal of 36 per 1,000.

Figure 9. Fertility Rate per 1,000 Women Aged 15-17, 2009-2012

Asian rates are too low to be calculated. Rates are not calculated when there are less than 6 occurrences of the event over the course of 2009-2012.

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

The overall fertility rate of 15-17 year olds in the TUH service area (38) is slightly higher than the rate in Philadelphia (31), but is more than six times the rate among this age group in Montgomery County (6).

Latina (49) and Black (39) women age 15-17 have the highest fertility rates among this age group in the TUH service area.

- The fertility rates among these two racial and ethnic groups are three to four times higher than the fertility rates among White women aged 15-17 in this area (12).
- The fertility rate for Black adolescents in the service area (39) is twice the rate for Black adolescents in Montgomery County (20).
- The fertility rate for White adolescents (12) in the TUH service area is four times the rate for White adolescents in Montgomery County (3).

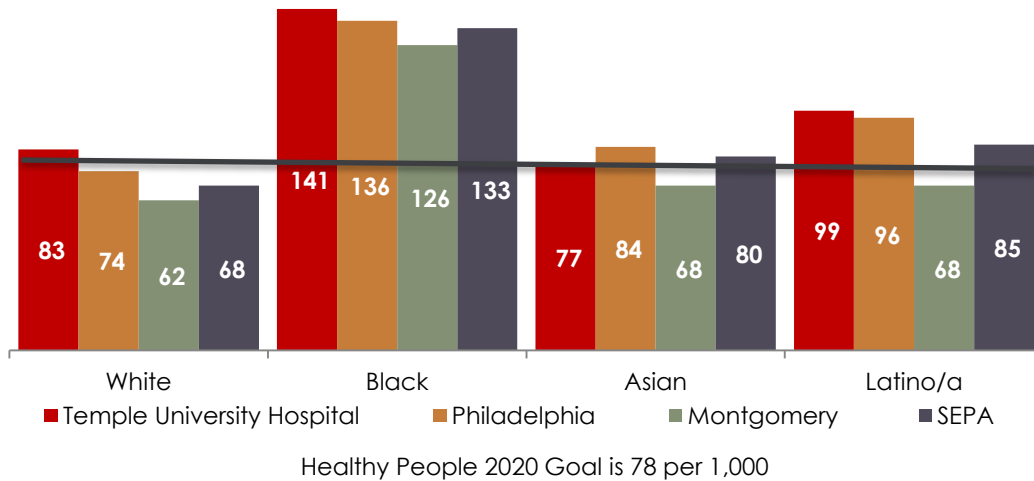

LOW BIRTH WEIGHT

Low birth weight births (<2,500 grams or less than 5lb 8 oz) place infants at greater risk for dying within the first year of life than infants of normal birth weight.

In the TUH service area, 118 births per 1,000 live births are low birth weight. This represents an average of 1,276 low birth weight births annually.

- This rate (118) exceeds the HP 2020 goal (78 per 1,000).
- The TUH service area low birth weight rate (118) is higher than the Philadelphia (109), Montgomery County (70), and SEPA rates (91).

Figure 10. Rates of Low Birth Weight Births, 2009-2012

Rates are not calculated when there are less than 6 occurrences of the event over the course of 2009-2012. Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Black births in the TUH service area are much more likely to be low birth weight than White births (141 per 1,000 versus 83 per 1,000).

- Latina/o births (99) also have higher rates of low birth weight compared to White births (83).
- Only Asian births in the service area (77) meet the HP 2020 goal of 78 per 1,000.

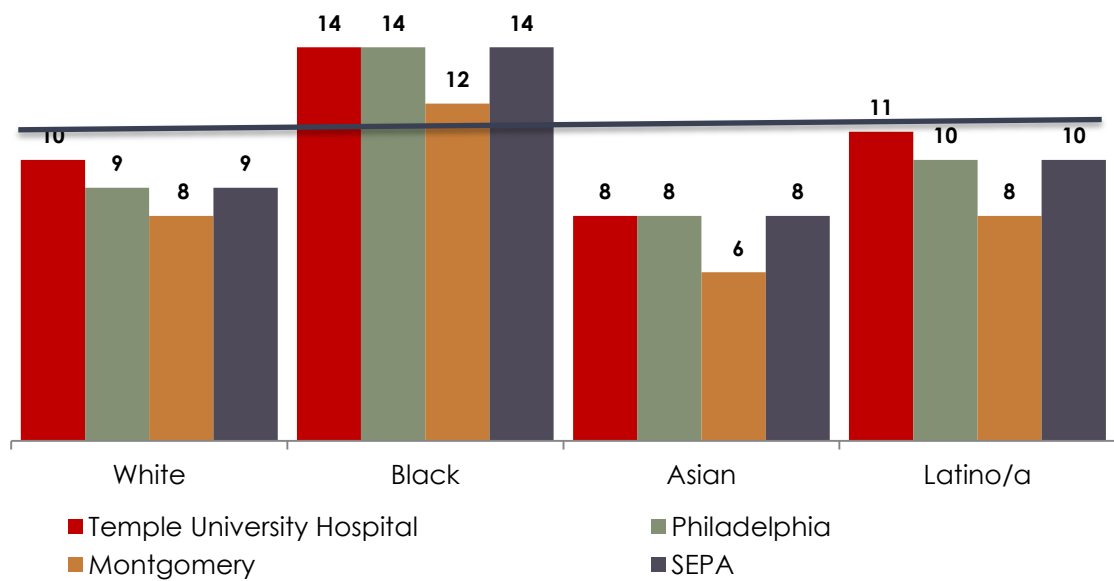

Blacks, Latino/as, and Whites in the service area have a higher low birth weight rate than their counterparts in Philadelphia, Montgomery County, and SEPA.

PREMATURE BIRTH

There is an average of 1,338 premature births (less than 37 weeks gestation) every year to women living in the TUH service area, representing 12% of all live births.

- This percentage (12%) does not meet the Healthy People 2020 goal (11.4%).
- This percentage is similar to Philadelphia (12, representing 2,670 births) and higher than Montgomery County (8; 739).

Figure 11. Percentage of Premature Births, 2009-2012

Healthy People 2020 goal is 11.4%

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research.
 Calculations prepared by PHMC.

Black births in the TUH service area (14%) are more likely to be premature than births to other racial and ethnic groups, while Asian births (8%) are least likely to be premature.

- Black, Latino/a, and White births in the TUH service area are more likely to be premature than their counterparts in Philadelphia, Montgomery County, and SEPA.

PRENATAL CARE

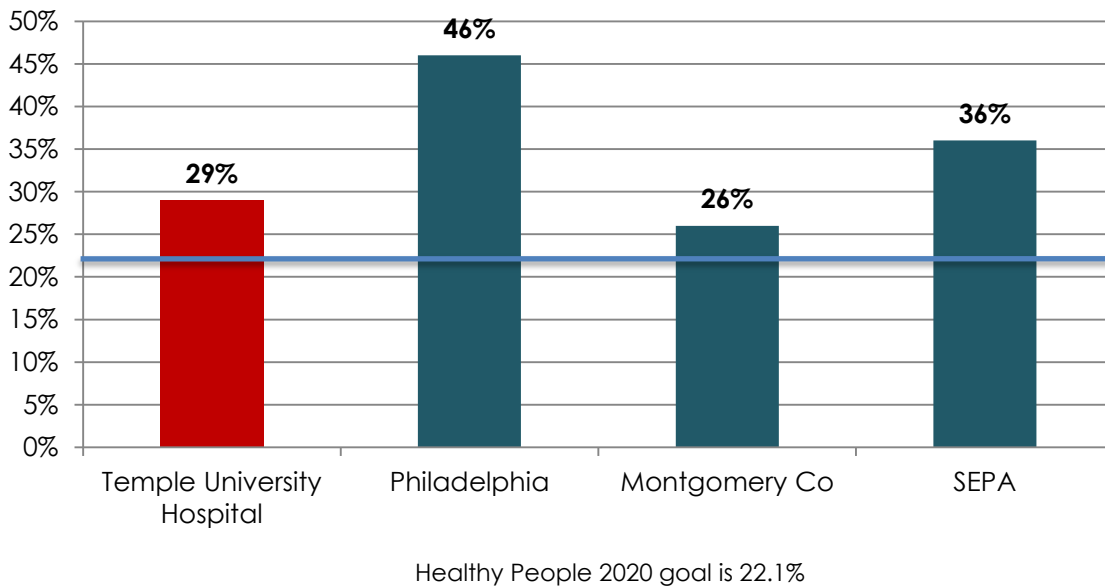

Receiving prenatal care during the first trimester of pregnancy can help ensure that health concerns are identified and addressed in a timely manner.

One-half of women in the TUH service area (50%) initiate prenatal care after the first trimester or have no prenatal care at all.

- This percentage (50%) is more than twice the HP 2020 goal of 22.1%.
- The service area percentage (50%) is also higher than the percentage in Philadelphia (46%), Montgomery County (26%), and SEPA (36%).

The percentage of Black women (53%) receiving late or no prenatal care is higher than the percentage of Latina (51%), Asian (46%), and White women (39%) with late or no prenatal care.

Figure 12. Percentage of Women with Late or No Prenatal Care, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

MORTALITY

INFANT MORTALITY

Every year, an average of 107 infants living in the TUH service area die before their first birthday.

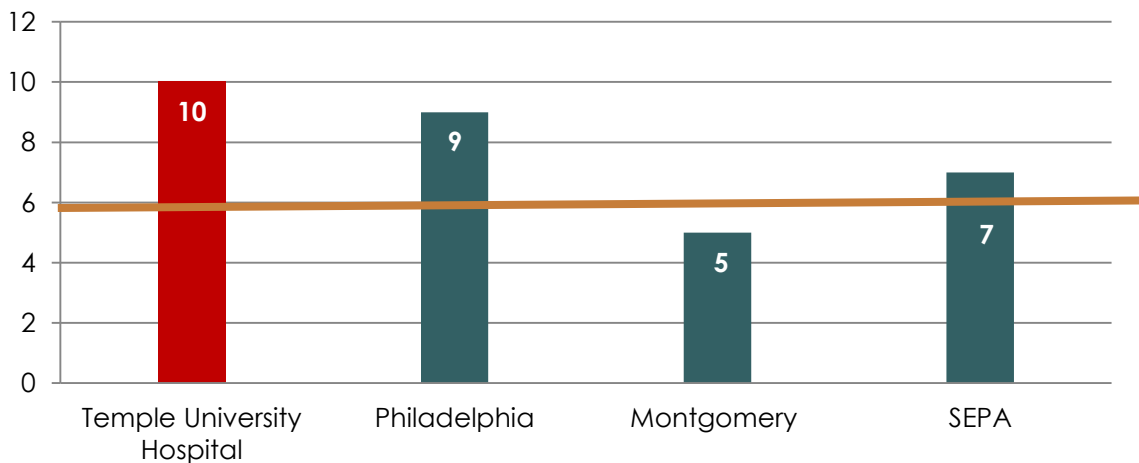

- The service area infant mortality rate is 10 infant deaths per 1,000 live births.
- The TUH service area's infant mortality rate (10 deaths per 1,000 live births) does not meet the HP 2020 goal of 6 infant deaths per 1,000 live births.

The service area infant mortality rate is higher than the rate in Philadelphia (9), Montgomery County (5), and SEPA (7).

Black infants (14) in the TUH service area are more likely to die in the first year of life than infants from other racial and ethnic backgrounds.

- The White infant mortality rate (13) is the second highest in the TUH service area, followed by Latino/a (6) and Asian (5) infant mortality rates.

Figure 13. Infant Mortality Rates, 2009-2012

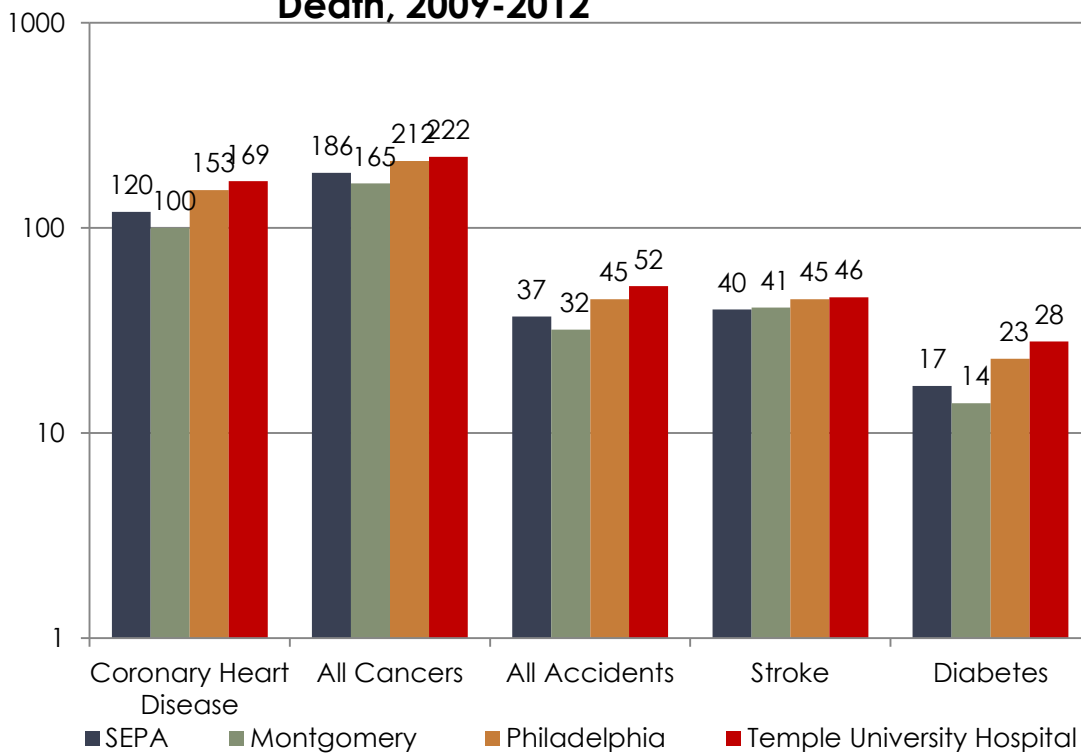

Healthy People 2020 Goal = 6

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research.
Calculations prepared by PHMC.

MORTALITY

The overall mortality rate in the TUH service area is 957 deaths per 100,000, representing an average of 5,173 deaths annually among persons of all ages. This is higher than the Philadelphia (893) and Montgomery County (664) rates.

Figure 14. Mortality Rates for Top Five Causes of Death, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research and 2010 U.S. Census. Calculations prepared by PHMC.

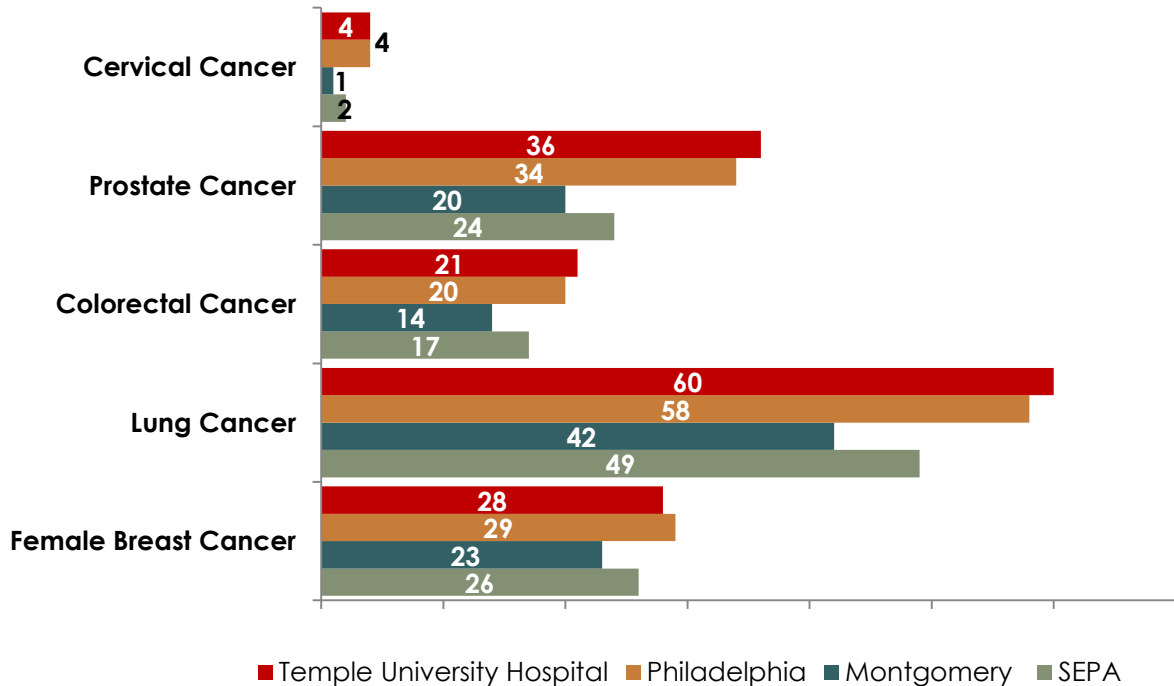

Cancer is the leading cause of death in the TUH service area (222: 1,188).

- This does not meet the HP 2020 goal of 161.

The other leading causes of death in the TUH service area are:

- Coronary Heart Disease (169; 894) (does not meet HP 2020 goal of 103.4);
- Accidents (52; 307);
- Stroke (46; 236) (does not meet HP 2020 goal of 34.8);
- Diabetes (28; 149);
- Homicide (24 157); and
- HIV/AIDS (10; 57).

Figure 15. Mortality Rates for Selected Cancer Sites, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Lung cancer has the highest mortality rate among site-specific cancers (60; 322) in the service area, followed by Prostate (36; 66), Female Breast (28; 90), and Colorectal Cancer (21; 113).

- Other than Female Breast cancer (28 in TUH and 29 in Philadelphia), all of these rates for the service area are higher than the rates in Philadelphia overall.
- Furthermore, all of the cancer rates in the service area are higher than rates in Montgomery County and SEPA.
- Service area rates for Lung (60), Prostate (36), Colorectal (21), and Female Breast Cancer (28) do not meet the goals of HP 2020:
 - Lung Cancer (60 versus 45.5);
 - Prostate Cancer (36 versus 21.8);
 - Colorectal Cancer (21 versus 14.5); and
 - Female Breast Cancer (28 versus 20.7).

MORBIDITY

HIV AND AIDS

The prevalence of individuals who are living with HIV/ AIDS in Philadelphia (46 per 100,000) is the highest in the SEPA region.

- This represents 2,100 persons in Philadelphia living with HIV/AIDS.
- The rate in Montgomery County is far lower than in Philadelphia (6 per 100,000), representing 155 persons.
- HIV/AIDS rates are lower in Chester (6) and Montgomery Counties (6) and highest in Philadelphia (46) and Delaware County (16).

The overall rate of people living with HIV/AIDS in Pennsylvania is 11, representing 4,320 people.

Figure 16. Rates of Persons Currently Living with HIV/AIDS by County, 2014

Sources: Pennsylvania Department of Health, HIV/AIDS Investigations-Bureau of Epidemiology and American Community Survey.

COMMUNICABLE DISEASE

The Hepatitis B rate in Delaware County (35 per 100,000) is the highest rate in the region, with Philadelphia having the second highest rate (31 per 100,000).

Chlamydia rates in Philadelphia are the highest in the region (1,317 per 100,000) and more than double the rate in Delaware County (458 per 100,000).

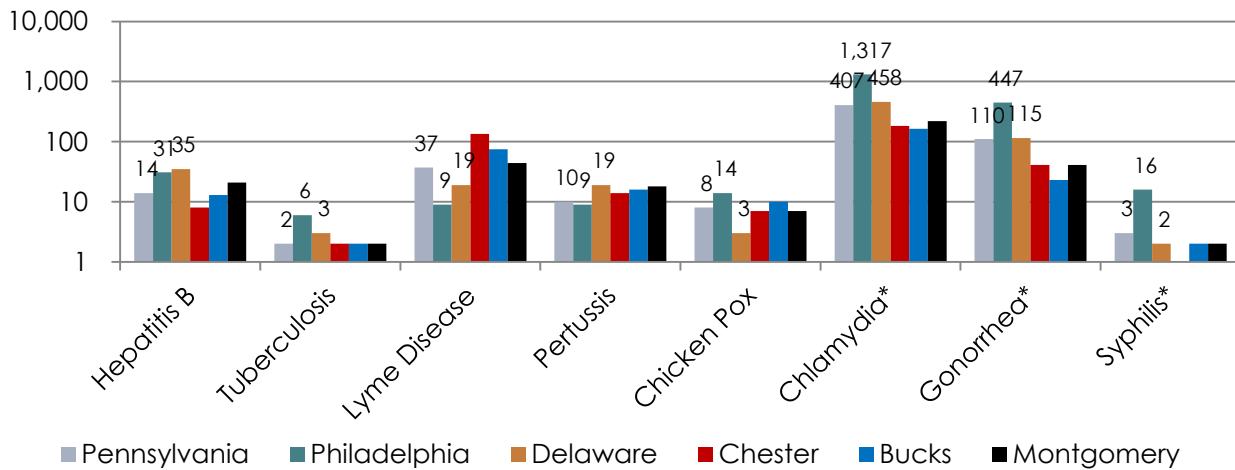

Gonorrhea rates in Philadelphia are the highest in the region (447 per 100,000) followed by Delaware County (115 per 100,000).

Syphilis rates continue to be highest in Philadelphia (16), which is 8 times higher than the next highest rate in Delaware County (2).

Philadelphia has the highest Chicken Pox rate in the region (14); the second highest rate is in Bucks County (10) followed by Montgomery County (7).

Delaware County has the highest Pertussis rate (19) followed by Montgomery County (18). Chester County has the highest rate of Lyme disease (134), followed by Bucks (75) and Montgomery (44) Counties.

Figure 17. Communicable Disease Incidence per 100,000, 2013-2014

HEALTH STATUS

A **majority** of adults in the service area describe their health as excellent, very good or good

SELF-REPORTED HEALTH STATUS

Self-reported health status is one of the best indicators of population health. This measure has consistently shown to correlate very strongly with mortality rates.¹ Three-quarters of TUH service area adults (74%) are in excellent, very good, or good health.

- This (74%) is a smaller percentage of healthy adults than in Philadelphia (78%) or Montgomery County (86%).
- Across SEPA, 84% describe their health as excellent, very good, or good.
- However, 26% of adults in the TUH service area (130,900) describe their health as fair or poor.

Figure 18. Health Status of Adults 18+, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

Nine percent of children (15,800 children) in the service area are in fair or poor health.

Figure 19. Children 0-17 in Fair or Poor Health, 2015

¹ Idler EL, Benyamini Y. Self-Rated Health and Mortality: A Review of Twenty-Seven Community Studies. *Journal of Health and Social Behavior*.1997; 21-37.

Across the TUH service area, about 37,500 older adults age 60+ are in fair or poor health (37%), a higher percentage than in Philadelphia overall.

- In Montgomery County, 17% of older adults describe their health as fair or poor, as do 29% of older adults in Philadelphia.
- Across the region, 21% of older adults are in fair or poor health.

Figure 20. Health Status of Older Adults 60+, 2015

Source: PHMC's 2012 and 2015 Southeastern Pennsylvania Household Health Surveys

Instrumental Activities of Daily Living (IADLs)

IADLs are activities related to living independently, such as using the telephone, shopping, cleaning, cooking, paying bills, and taking medication.

Activities of Daily Living (ADLs)

IADLs are activities related self-care, such as eating, dressing, grooming, walking indoors, bathing, and getting in and out of bed.

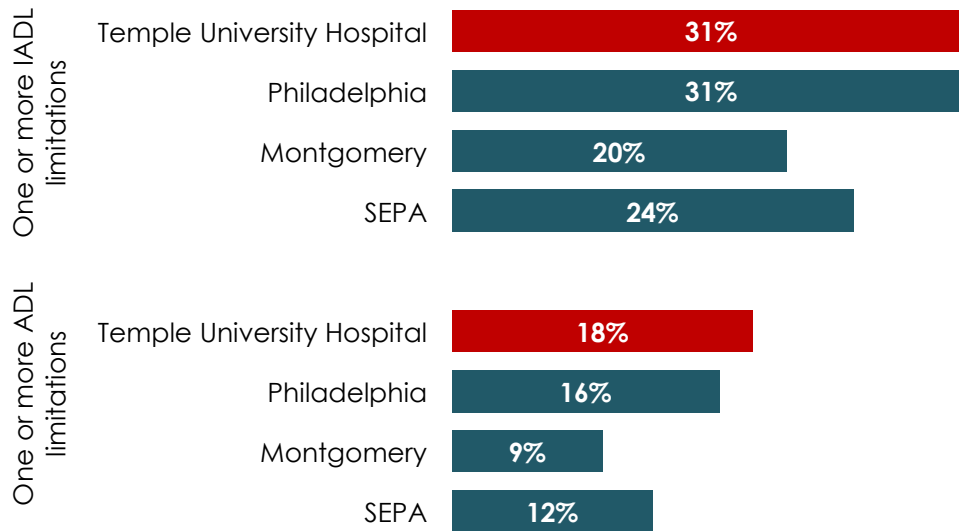

About 31,000 older adults in the service area, 31%, have at least one limitation in the Instrumental Activities of Daily Living (IADLs).

- This is a higher percentage than across SEPA, where 24% of older adults have at least one of these limitations.

Almost one in five adults age 60+ (18% or 18,400 adults), has at least one limitation in the Activities of Daily Living (ADLs).

- Throughout SEPA, the proportion of older adults with at least one ADL limitation is 12%.

Figure 21. ADL and IADL Limitations, Older Adults 60+, 2015

Source: PHMC's 2012 and 2015 Southeastern Pennsylvania Household Health Surveys

SPECIFIC HEALTH CONDITIONS

High blood pressure, diabetes, asthma, cancer, and mental health conditions are chronic illnesses that require ongoing care.

HYPERTENSION

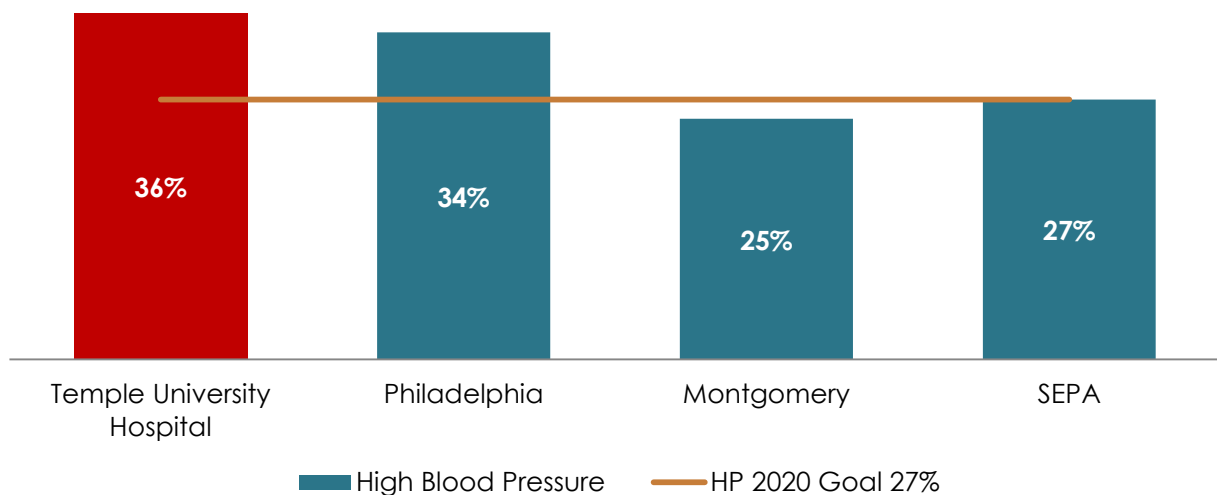

Community meeting attendees listed hypertension as one of the main healthcare issues about which people in this community should be concerned.

More than one-third of adults in the TUH service area (36%, or 186,400 adults) have been diagnosed with high blood pressure.

- This does not meet the HP 2020 goal of 27%.
- Seven in ten adults age 60+ in the service area (71%) have high blood pressure

Among adults in the service area with high blood pressure, nearly one in ten (8%) report not taking all or nearly all of their medication all of the time.

Figure 22. High Blood Pressure, Adults 18+, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

DIABETES

Attendees at community meetings listed diabetes as a primary concern for area residents.

About 66,100 adults in the TUH service area, 15%, have been diagnosed with diabetes.

- This is comparable to Philadelphia as a whole (15%), and higher than both Montgomery County (11%) and SEPA overall (13%).

More than one-quarter of adults age 60+ in the service area (27%) have diabetes; this represents 27,700 older adults.

Figure 23. Diabetes, Adults 18+ by CHNA Areas , 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

ASTHMA

Nearly one-quarter of adults in the TUH service area (23% or about 103,900 adults) have been diagnosed with asthma.

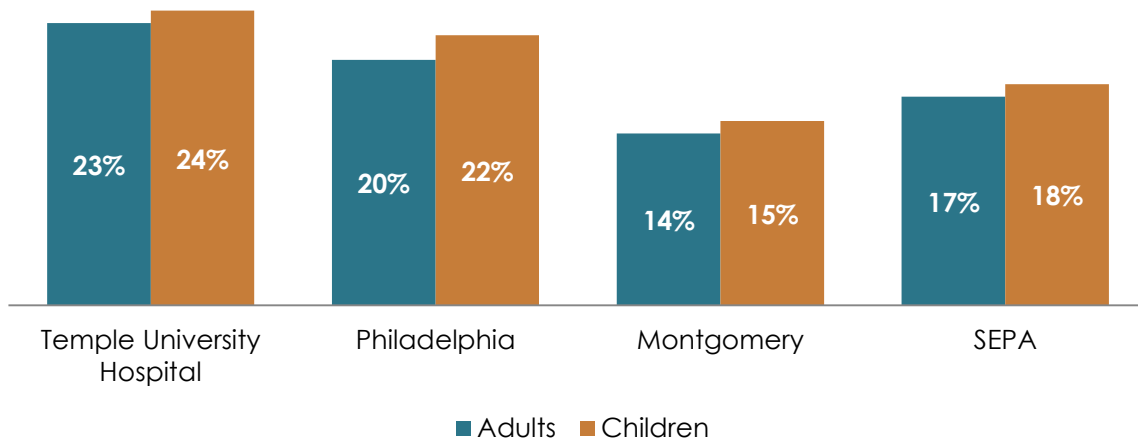

- Among adults with asthma, 21% of adults age 60+ have asthma.

One-quarter of children (24%) have been diagnosed with asthma; this represents 40,100 children in the service area.

- This percentage is comparable to Philadelphia (22%) but higher than childhood asthma rates across the SEPA region (18%) or in Montgomery County (15%).

Community meeting attendees talked about childhood asthma as a serious health issue facing the community, especially among children whose parents smoke. In addition, they talked about issues related to healthy homes, and the role that mold can play in childhood asthma.

Figure 24. Asthma, Adults 18+ and Children 0-17, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

OVERWEIGHT AND OBESITY

Overweight and obesity are strongly correlated with high blood pressure, diabetes, cancer, heart disease, and asthma.

- More than one in three service area adults age 20 and over (37%) are obese, and a similar proportion are overweight (35%).

This represents approximately 324,000 adults who are overweight or obese in the TUH service area.

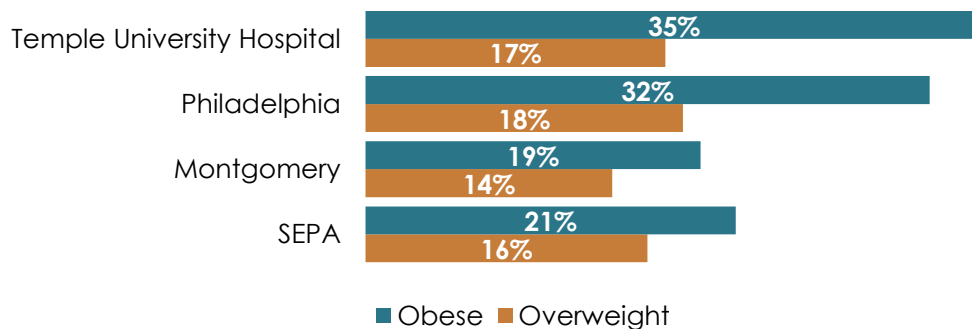

Figure 25. Obese and Overweight Adults (18+), 2014-2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

About 34,900 children in the service area (35%) are classified as obese, and 17% are overweight.

Figure 26. Obese and Overweight Children (0-17), 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

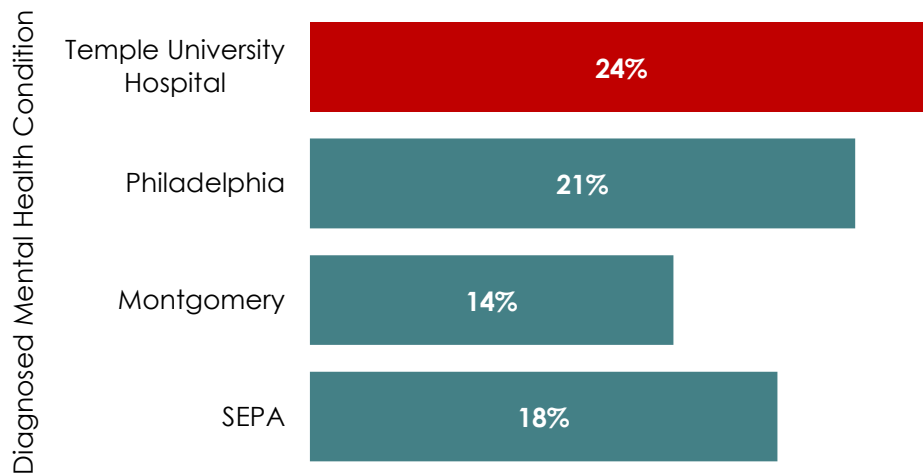

MENTAL AND BEHAVIORAL HEALTH

Mental and behavioral health was listed as the number one health concern by community meeting attendees, who cited specific concerns about mental and behavioral health in TUH's service area: treatment for IV drug users and mentally ill homeless adults; PTSD among children; and post-partum depression among new mothers.

About one-quarter of adults in the service area (24% or approximately 108,700) have been diagnosed with a mental health condition.

- Of those with a mental health condition, one-third (33%) are not receiving treatment for the condition.

Figure 27. Mental Health Status of Adults 18+, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

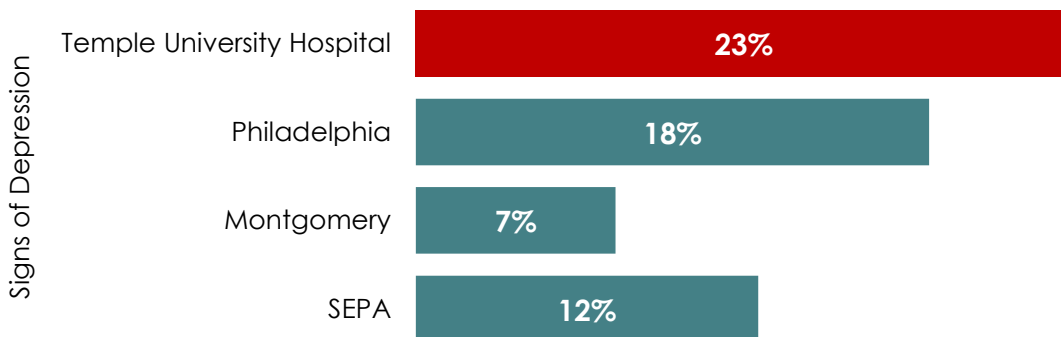

Community meeting participants identified many areas of concern involving untreated mental and behavioral health in TUH's service area. Some felt that this was the number one health issue in the community. They characterized the area as "high need, low access" for treatment, noting that follow-up was often poor. Substance abuse is a "big issue" in the community because, according to community members, drug dealers in this part of the city provide one of the purest forms of heroin, and this zip code has the highest rate of drug users in the city. One participant remarked, "A 15 minute ride north

takes 7 years off my life.” Many substance abusers use up their allotment of treatment days for the year, and are left with no resources.

This area also has the highest rate of homelessness in the city, according to community members. The homeless are often in need of mental as well as behavioral health treatment, but it is very difficult to provide long term treatment to this transient population. Substance abuse among seniors was also a concern for community meeting attendees. “Seniors are expelled from living facilities for using.” Meeting participants felt that mental illness and substance abuse affects the entire community, and is debilitating for family, the neighborhood, and beyond. “It permeates everything.”

Among older adults living in the community, depression is a serious mental health problem. About 21,100 older adults in the service area (23%) have four or more signs of depression on the CES-D 10 Item Depression Scale.

Figure 28. Depression in Older Adults 60+, 2015

Source: PHMC’s 2015 Southeastern Pennsylvania Household Health Survey

About 7% of older adults in the TUH service area, 7,300, report speaking to friends or relatives less than once a week.

- This may be an indicator of social isolation.
- In Philadelphia, 5% of older adults speak to friends or relatives less than once a week, as do 6% in both Montgomery County and across SEPA.

Community meeting attendees noted a lack of resources for older adults with dementia, and said that they “fall through the cracks” because dementia is not treated by the mental health system.

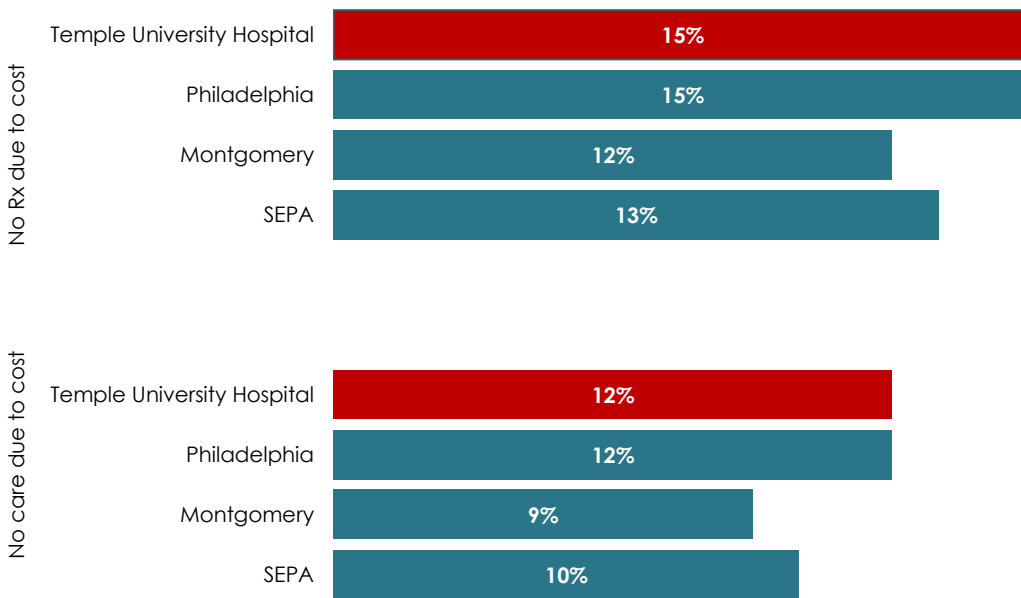

V.ACCESS AND BARRIERS TO HEALTH CARE

Having a regular source of care, a health professional residents can go to if they are sick or have a question about their health, is important because people who have a regular source of care are more likely to seek care when they are sick compared with those who do not. This allows people to receive earlier, less expensive treatment, get well sooner, and prevents costly complications and longer illnesses.

ECONOMIC BARRIERS

With or without health insurance, 56,300 adults in the service area were unable to get needed care due to the cost of that care; 12% of adults reported that there was a time in the past year when they needed healthcare, but did not receive it due to the cost. About 69,200 adults in TUH service area (15%) were prescribed a medication but did not fill the prescription in the past year due to cost.

Figure 29. Cost Barriers to Care, Adults, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

Attendees at community meetings discussed the high cost of prescription drugs, and described situations where people have to choose between paying for their utilities or their pain medication.

HEALTH INSURANCE COVERAGE

Having health insurance is important in ensuring quality and continuity of care over time. The service area does not meet the HP 2020 goal of 100% coverage.

The majority of adults (87%) in the service area have health insurance coverage. Furthermore, one in four adults in the TUH service area (39% or about 26,700) has enrolled in health insurance plans through the Federal Marketplace since 2013.

However, a sizable percentage of adults aged 18-64 do not have any private or public health insurance; 13% of adults aged 18-64 in the service area are uninsured, representing 51,100 uninsured adults.

- This is comparable to Philadelphia County (12%) and higher than across SEPA (9%) or in Montgomery County (5%).

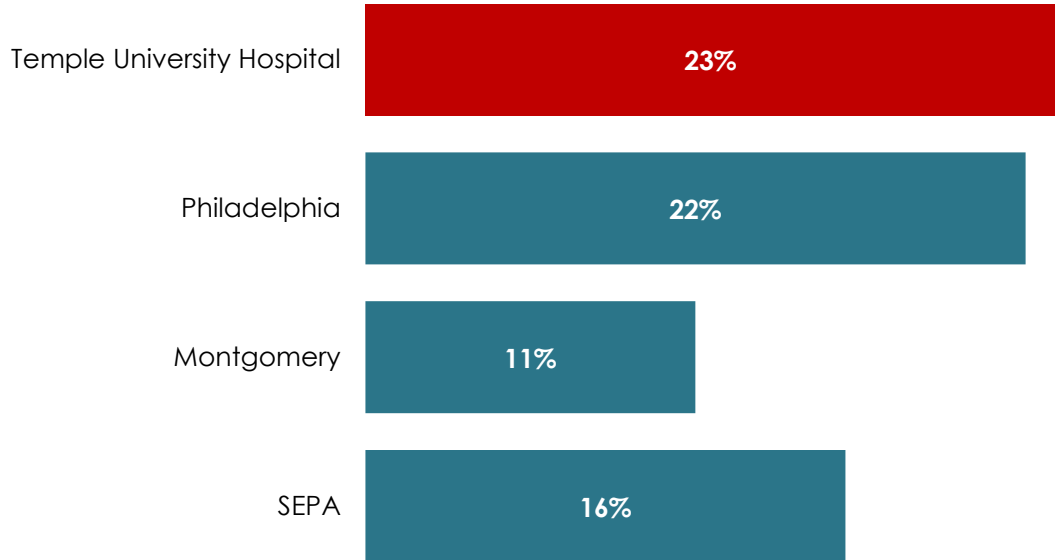

Figure 30. No Health Insurance, Adults 18-64, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

Nearly one in four adults in the service area (23% or 104,900) does not have prescription drug coverage.

Figure 31. No Prescription Drug Insurance, Adults, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

PRIMARY CARE

Having a regular source of care is important since people who have a regular source of care are more likely to seek care when they are sick compared with those who do not.

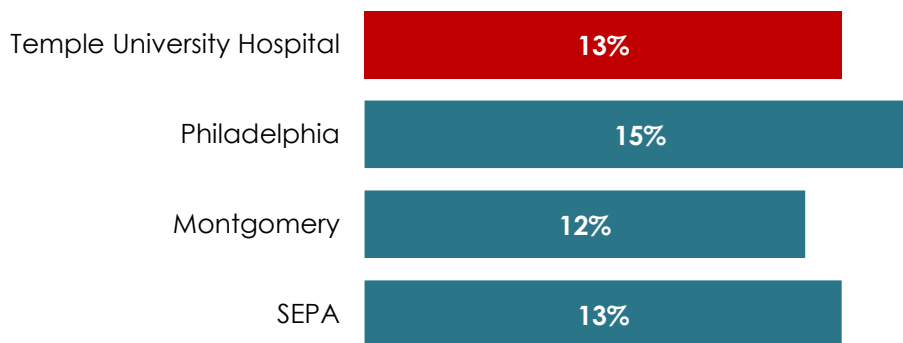

According to community meeting attendees, long waits deter people for receiving necessary care at clinics, and urgent care facilities aren't available in low-income neighborhoods. Community meeting attendees also described perceptions about medical care among area residents, including the idea that doctors only give "bad news," which serves as a barrier to routine care. People also delay care until something serious happens.

In the TUH service area, 13% of adults (about 34,000) do not have a regular source of primary care they can consult if they are ill or have a question about their health.

Approximately 8,600 children in the service area (5%) do not have a regular source of care.

- The percentage of children in TUH's service area without a regular source of care is similar to the percentage without a medical home in Philadelphia overall (4%), Montgomery County (4%), and SEPA (4%).

Figure 32. No Regular Source of Care, Adults, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

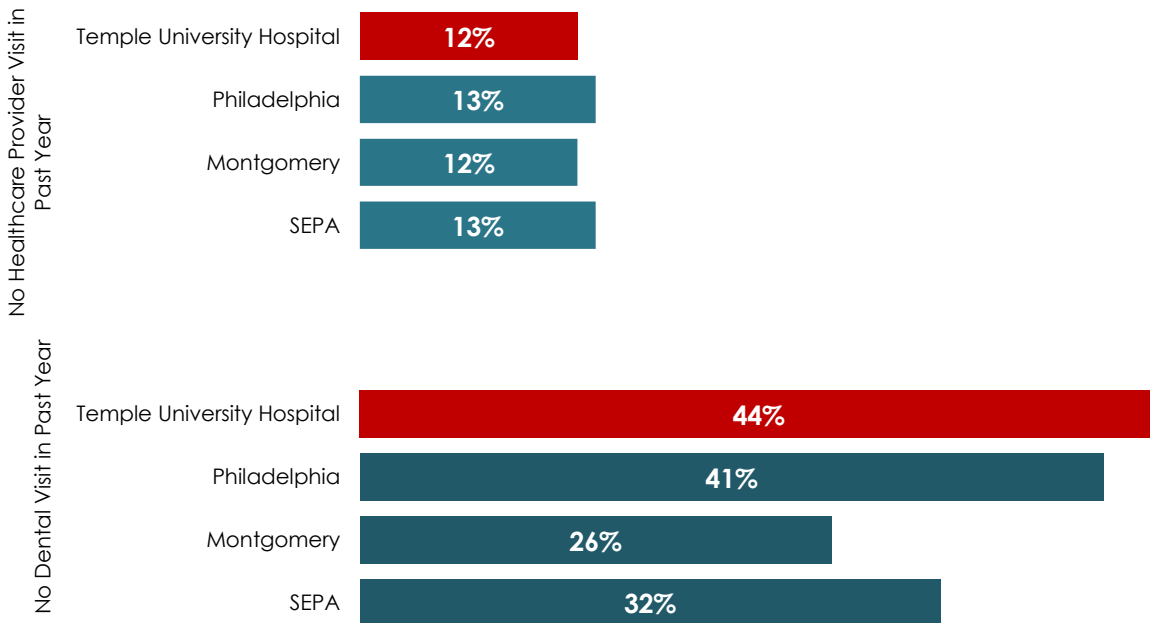

PREVENTIVE CARE

Regular health screenings can help identify health problems before they start. Early detection can improve chances for treatment and cure and help individuals to live longer, healthier lives.

In the TUH service area, 12% of adults did not visit a health care provider in the past year; this percentage represents 53,600 adults.

Meeting attendees noted that many people are resistant to preventive screenings, often believing they are young and invincible. Also, people have so many immediate, serious issues that it is difficult for them to worry about the future.

Figure 33. Healthcare Provider and Dental Visits, Adults, 2015

Source: PHMC’s 2015 Southeastern Pennsylvania Household Health Survey

RECOMMENDED SCREENINGS

DENTAL VISIT

More than two out of five adults in the service area (44% or about 203,800) did not have a dental visit during the past year. This is higher than the percentage in the surrounding area.

Attendees at community meetings noted that dental care access is a problem and that cost is a primary factor.

- In Philadelphia, 41% of adults went without a dental visit in the past year as did 26% of adults in Montgomery County and 32% of adults across the SEPA region.

One in five children in the service area (21% or about 36,100) did not have a dental visit during the past year.

BLOOD PRESSURE SCREENING

About 45,200 adults in the service area (10%) did not have a blood pressure test in the past year.

- This is similar the proportion across SEPA as a whole and in Philadelphia and Montgomery County.

COLONOSCOPY

Regular screenings beginning at age 50 are recommended to prevent colorectal cancer.

- More than one in three adults 50 years of age and older in the service area (35%) did not have a colonoscopy in the past ten years.
- Screening rates in the TUH service area are lower than in the surrounding area. Across the SEPA region, 30% went unscreened, as did 30% in Philadelphia County and 29% in Montgomery County.

PAP SMEAR TEST

Approximately 30,100 women aged 21 to 65 in the service area (13%) did not receive a Pap smear in the past three years. This is comparable to SEPA as a region and Montgomery and Philadelphia Counties.

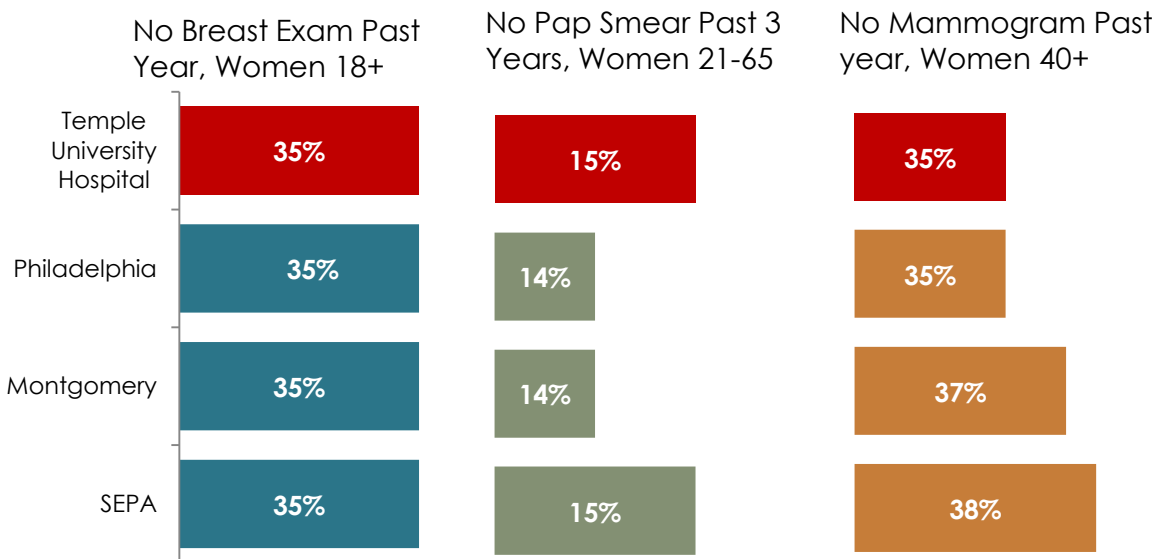

MAMMOGRAM

The American College of Radiology (ACR) and Society of Breast Imaging (SBI) continue to recommend that women get yearly mammograms starting at age 40. The Healthy People 2020 goal for screening mammography is 81.1% of age appropriate women screened. This service area (65%) does not meet this goal.

Attendees at community meetings talked about the importance of affordable access to mammograms at a stationary location so that patients can receive necessary follow-up care.

About 58,000 women age 40 and over in the service area (35%) did not have a mammogram in the past year. This is comparable to Philadelphia (35% unscreened), and slightly better than SEPA (38% unscreened) and Montgomery County (37%).

Figure 34. Women’s Health Screenings, 2015

Source: PHMC’s 2015 Southeastern Pennsylvania Household Health Survey

PSA OR RECTAL EXAMS FOR PROSTATE CANCER

Six in ten men aged 45 years and older in the TUH service area (61%) did not have a screening for prostate cancer in the past year.

- This is higher than in Philadelphia County (55%), Montgomery County (48%) and across SEPA (49%).

VI. HEALTH BEHAVIORS

NUTRITION

According to the USDA's MyPlate food guidelines, adults should eat 4-5 servings of fruits and vegetables daily.²

In the TUH service area, 85% of adults do not reach this recommended goal.

- This is worse than in Philadelphia (82%), Montgomery County (73%) and SEPA as a whole (77%).
- Fast foods are often high in unhealthy calories, saturated fats, sugar, and salt. Nearly one-half of adults in the service area (44% or about 204,500) reported eating fast food at least once in the past week.

Community meeting attendees described a disconnect between the healthy meals taught in nutrition education sessions and the ethnic foods eaten by many in the service area.

EXERCISE

The U.S. Department of Health and Human Services' 2008 Physical Activity Guidelines for Americans recommends that adults (ages 18-64) get 2.5 hours of moderate aerobic physical activity each week.³

Community meeting attendees talked about the need for safe outdoor spaces for physical activity.

One-quarter of adults in the service area (26%) do not participate in any exercise, and one-half (50%) exercise fewer than three times each week.

- Across SEPA, 22% report not exercising.

²The U.S. Departments of Agriculture, (2011). Dietary Guidelines Consumer Brochure. Retrieved online on October 23, 2012 at <http://www.choosemyplate.gov/food-groups/downloads/MyPlate/DG2010Brochure.pdf>

³U.S. Department of Health and Human Services. 2008 Physical Activity Guidelines for Americans, 2008.

The percentage of adults who smoke in the service area **does not meet** the Healthy People 2020 goal of 12%. The percentage of smokers who have tried to quit in the past year **does not meet** the Healthy People 2020 goal of 80%.

TOBACCO USE

“Smoking is a huge problem in this community.” Community meeting participant.

In the TUH service area, 24% of adults smoke cigarettes. This represents approximately 111,600 adults.

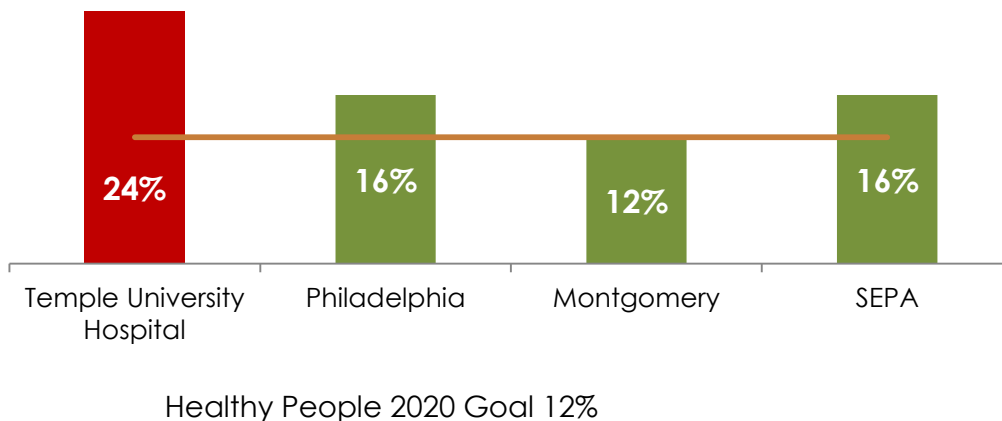

- This is much higher than the smoking rate in the surrounding area, with 16% of Philadelphia adults, 12% of Montgomery County adults, and 16% of all adults across SEPA smoking cigarettes.

Within the service area, 65% of smokers have tried to quit during the past year.

- This is higher than in Philadelphia (61%), Montgomery County (53%), and SEPA as a whole (59%), but does not meet the Healthy People 2020 goal of 80% of smokers trying to quit.

Community meeting attendees acknowledged that people are willing to quit smoking, but current smoking cessation messages are not effective.

Figure 35. Adult Smokers, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

VII.EXISTING RESOURCES

The existing health and social services in the service area, and for Southeastern Pennsylvania as a whole, were inventoried for this report. Information on health and social services was obtained by internet searches and from the Yellow Pages. Health services included: acute care general hospitals; inpatient psychiatric hospitals and long-term psychiatric facilities; and rehabilitation hospitals. Skilled and intermediate care nursing facilities were not included. Health services also included community health centers and clinics, urgent care centers, and state, city, and county health department service locations. Existing social services which were inventoried included: food pantries, WIC centers, farmer's markets, and soup kitchens; community outpatient mental health and mental retardation services; senior services; social work services; homeless and domestic violence shelters; and YMCA's. These existing health care and social service resources are shown on the maps of the hospital's service area and for Philadelphia in Appendix F.

VIII.SPECIAL POPULATIONS

One of the goals of this needs assessment was to identify health needs of special populations across the Temple University Hospital service area. This section focuses on selected health status and access to care needs of special populations in the service area.

LOW INCOME POPULATIONS

Many households in the Temple University Hospital service area struggle financially. The median household income in 2015 was just over \$30,000. More than about two in five (39%) households with children have incomes under the poverty line, as do more than one in four (29%) households without children. The unemployment rate is higher than most other areas in SEPA, with 20% of the work force unemployed. Nearly one-half (46%) of households rent their home, a rarity in SEPA that indicates an elevated level of housing instability.

Financial barriers to care are significantly more common in the service area than other parts of SEPA. Among adults, 13% are uninsured, almost double the rate for SEPA overall.

- About one in four (23%) do not have any prescription insurance.
- One in eight (13%) adults and one in twenty children (5%) do not have a regular source of care.

Among adults, one in eight (12%) did not visit a health care provider in the past year at all.

- One in eight (12%) also reported they did not receive needed care due to the cost. Community members discussed how copays and the cost of transportation can keep lower income adults and children from accessing care.

About one in seven (15%) did not fill a needed prescription due to cost; community members indicate that not filling prescriptions or not taking prescriptions exactly as prescribed may be more common than this.

- Community meeting attendees also discussed non-financial barriers to routine medical care among those who have limited incomes.
- Some community members felt that a physician's willingness to talk to patients "like people" depended on the patient's income level.

- Many in lower-income communities have a lot to deal with in the present, and are not looking to the future yet.
- Some believe that there is no reason to get screenings when treatment will not really be available to them because they are underinsured or have no insurance.

Access to dental care in this population was of serious concern to community members:

- Nearly one-half of adults (44%) and one in five (21%) children did not visit a dentist in the past year, significantly more than in other areas of SEPA. Community members state that the main barrier to dental care in this population is cost.
- Community members report that poor dental health in this population causes a lot of physical suffering, self-esteem issues, eating problems and impacts other health conditions.

Access to food is also an issue for low income adults and children in the service area.

- A large majority of both adult (85%) and child (76%) service area residents ate fewer than four servings of fruit and vegetables in a typical day.
- One in six (16%) adults in the service area cut out a meal in the past month due to financial reasons, more than twice as many as in SEPA overall.

OLDER ADULTS

As indicated by representatives at Philadelphia Department of Public Health, addressing health concerns in some strategic areas is age-specific, such as teens and sexual health and children and obesity.

The community meetings identified older adults as a population with specific needs and challenges related to health care. In addition, there are clear disparities in older adult health compared to other parts of SEPA. Although there are fewer age 65+ adults in the TUH service area as compared to many other parts of SEPA, the population in the service area is aging:

- Currently, 10% of the population is age 65 or older, with the proportion of older adults expected to increase to 12% of the population by 2020, representing more than 78,000 adults age 65 and older.

Older adults in the Temple University Hospital service area are significantly more likely than other older adults in SEPA to have chronic health conditions, poor general health, and are also more likely to experience challenges with activities of daily living.

- More than one in three (37%) older adults in the service area reported fair/poor health.
- More than one in six (18%) older adults in the service area reported experiencing limitations with at least one activity of daily living (such as eating, bathing, and walking). One in three (31%) reported limitations with instrumental activities of daily living, such as cleaning, shopping, using the telephone, or managing medications.
- More than seven in ten adults in the service area (71%) have high blood pressure; a majority (59%) have arthritis; and more than one in four (27%) have diabetes. Nearly one in four (23%) have signs of depression, and one in five (21%) has asthma.

Older adults in the service area are more likely to need supportive services and are also more likely to wish to leave their current home sooner.

- One in four (25%) older adults wished to leave their current home in the next five years.
- One in ten (10%) are already paying for personal care in their home and 8% reported needing meal or food programs.

Community meeting attendees expressed fears that older adults who are not well enough to be independent will not be able to get appropriate and affordable housing.

- Meeting attendees were concerned that older adults in the community who need assistance with daily care will end up in nursing homes with a poor quality of care.

Older adults may have more trouble accessing health information relevant to understanding the need for screenings, treatment regimens, or navigating the health care system in general, as compared to younger people, according to the community meeting attendees:

- Community meeting attendees emphasized that much information is available only online, and that older adults often do not have access to the internet or do not understand how to find these resources. Hard copies of educational materials and other resources are needed to reach this population.
- Community members discussed the possibility that age-related cognitive challenges may affect the ability of some older adults to navigate health care systems, and manage their medical conditions.

Transportation challenges were noted to be a significant barrier for this population in the community meetings in getting access to health care locations.

- In the HHS, one in eight (12%) older adults reported needing transportation services.

NORTH PHILADELPHIA NEIGHBORHOOD CONCERNS

Community members expressed concerns about disparities in health care access among populations of color in the TUH service area, but discussed them in ways that anchored them to geographic neighborhoods. No one racial/ethnic group was a majority in this service area in 2015.

- Nearly one-half of the residents are Black (47%); one in four (24%) are Latino; one in five (21%) are White, 6% are Asian and 2% are other ethnicities.

Several themes came out that were common to many neighborhoods in the service area:

- Some racial and ethnic communities experience language barriers when trying to access care.
- Only about two in three adults in the service area (66%) speak English at home. Close to one in five speak Spanish (19%); but Asian languages (6%) or other languages (10%) are also spoken by thousands of people in the service area.
- Community members report that it's very difficult to find primary care providers who speak languages other than English.

Community members reported feelings of mistrust for health care providers from outside the community, and identified this as a barrier to care.

- Community meeting attendees felt that health care providers should be seen in the neighborhoods and participate in community events and health education.
- Community education models that use family members, friends, and other informal community leaders or people who are already close to the targeted population may be more effective than education efforts using health care professionals, for some populations.
- More health care providers who "look like" the population they serve might break down barriers to care, according to meeting attendees.

In North Philadelphia neighborhoods, community members reported a lack of access to urgent medical care locations that are not the ER.

- Primary care providers are overloaded and don't have appointments open for sick children or adults.
- Long waits deter people from seeking care.

Larger neighborhood challenges both affect health and access to care:

- Only about two in three (69%) residents of the service area feel safe outdoors in their neighborhood during the day.
- Some neighborhoods in the service area have pervasive drug use, which affects everyone in the neighborhood.

Stress and trauma from neighborhood violence take a toll on everyone's physical and mental health, according to meeting attendees.

- As stated by representatives at Philadelphia Department of Public Health (PDPH): "Racial and ethnic health disparities occur across all health areas, but are especially troubling for blacks and Hispanics. Targeted interventions are needed for people of color across all strategic areas."

IMMIGRANT POPULATIONS

Immigrant populations face additional issues related to their legal status when trying to access medical care for cancer. Some specific challenges discussed at the community meetings include:

- Payment challenges.
- Even those who have a green card or other legal immigration status often do not have access to insurance.
- People with undocumented status face specific challenges related to their legal status.
- Fear of deportation: some are concerned that engaging in the medical system in any way will result in deportation, which means they often do not access screenings, diagnostic services, or care when they need these services.
- Even those who do not fear deportation do not know where they can find affordable care.
- Some families have mixed documentation status, which complicates care—especially when older children in a family are undocumented and younger children are citizens and have insurance.
- Although the medical system is complex for many people to access, immigrants who are unfamiliar with everything about the US medical care system may not know where to start when obtaining needed care.

IX. SOCIAL DETERMINANTS OF HEALTH AND UNMET NEEDS

The World Health Organization (WHO) defines the Social Determinants of Health as “the conditions in which people are born, grow, live, work and age...which are mostly responsible for health inequities.” This definition is seconded by HP 2020, which defines the social determinants of health as, “the conditions in the places where people live, learn, work, and play which affect a wide range of health risks and outcomes.”

Much of the unmet need in the TUH service area relates to key social determinants of health such as:

- Housing access;
- Working conditions;
- Poverty;
- The built environment, including healthy food access and physical activity; and
- Health care access.

To help think about how best to address social determinants of health, HP 2020 developed a place-based organizing framework reflecting five key areas of the social determinants of health:

- Economic Stability
- Education
- Social and Community Context
- Health and Health Care
- Neighborhood and Built Environment

These five priority areas can be applied to prioritize future interventions in the TUH service area, since all of the health outcomes that need to be improved are driven by the social determinants of health listed above.

The previous Community Health Needs Assessment conducted by TUH identified the following priority areas to improve the health of its communities: (1) improve the health of moms and newborns; (2) address the dangers of obesity and overweight BMI; (3) improve heart and vascular health; (4) improve access to mental health resources; (5) strengthen awareness of gun violence; and (6) strengthen practices for providing culturally competent care.

TUH's report on its progress toward these needs, included in the Assessment section of this report, indicates that TUH has set in place many programs that will benefit the community it serves.

Findings from the 2016 Southeast Pennsylvania Household Health Survey indicated that almost all measures of physical and mental health remain statistically worse for the TUH service area when compared to indicators for the entire SEPA region. **Key indicators in the TUH service area, which should be targeted for improvement include:**

- Percentage of adults (18+) ever diagnosed with high blood pressure;
- Percentage of adults (18+) ever diagnosed with diabetes;
- Percentage of adults (18+) ever diagnosed with asthma;
- Percentage of adults (20+) and children who are overweight;
- Percentage of adults (20+) and children who are obese ;
- Percentage of adults (18+) with a substance abuse problem;
- Percentage of adults (18+) who receive treatment for a substance abuse problem;
- Percentage of adults (18+) ever diagnosed with a mental health condition;
- Percentage of adults (18+) and children who receive treatment for a mental health condition;
- Percentage of adults (18+) and children with no regular source of care;
- Percentage of adults (18+) who did not receive needed care due to cost;
- Percentage of adults (18+) that did not fill a prescription due to cost;
- Percentage of adults (18-64) currently uninsured;
- Percentage of adults and children who did not have a dental visit;
- Percentage of adults (50+) who did not have a colonoscopy in the past ten years;
- Percentage of women 21-65 who did not have a Pap test in the past three years;
- Percentage of adults (18+) who consume <4 servings of fruit and vegetables/day;
- Percentage of adults (18+) who exercise regularly; and
- Percentage of adults (18+) who smoke cigarettes.

Analysis of the quantitative and qualitative data collected also shows that the unmet health care needs of the residents of this service area include the following prioritized needs:

- Access to primary healthcare for adults and children. In particular, across the continuum of care for chronic disease management.
- Access to mental health treatment.
- Access to substance abuse treatment.

- Access to preventative health care and routine health screenings should be improved. In particular, cancer screenings for women and dental care for adults and children.
- Availability of high quality, affordable care, particularly for those individuals living in or near poverty, and who are uninsured or underinsured.
- Increased smoking cessation/ support resources.

Priority unmet needs in this area also include increased educational programs to address:

- Heart disease and cancer management for all residents, with a special focus on causative health behaviors and other factors;
- Access to low cost health insurance;
- Health education about healthy lifestyles and disease management; and
- Smoking cessation counseling.

Finally, according to community meeting participants, economic, cultural, and linguistic barriers to care remain for immigrants, some of whom may be undocumented, and poor and low-income Blacks, Asians, and Latinos living in the community. Beyond access to care, health literacy is a problem for almost all residents, many of whom have a basic distrust of hospitals and the health care system and/or do not believe in preventive care or fear getting bad news.

TUH's prior implementation plan addressed almost all of these needs with specific plans for the community and the hospital in the context of Temple's mission and resources. However, if possible, more face to face contact between staff and the community's minority racial and ethnic groups outside of the hospital, such as currently provided by the community health workers and navigators, would decrease residents' fears and negative expectation of being treated poorly as a minority and, in time, improve residents' knowledge of, and ability to practice, healthy lifestyles.

Building on the work that TUH has already done with community agencies in North Philadelphia is a valuable tool in building trust and learning how to meet patients' needs most effectively.

APPENDIX A: PHMC'S COMMUNITY AND POPULATION ASSESSMENTS

A list of community and population assessments PHMC has completed includes:

- 28 Community Health Needs Assessments for DVHC Member Hospitals, 2012
- Berks County Community Health Needs Assessment, 2012
- Philadelphia Health Care Trust Needs Assessment, 2011
- School District of Philadelphia Head Start Needs Assessment, 2010
- Jewish Federation of Greater Philadelphia Older Adult Needs Assessment, 2010
- Main Line Area Older Adults Needs Assessment, 2010
- William Penn Foundation Youth Development Initiative Population Studies, 2006, 2008, 2010
- National Nursing Centers Consortium Northeast Philadelphia Needs Assessment, 2009
- Latino Youth Needs Assessment, 2009
- National Children's Study Montgomery County Vanguard Center Needs Assessment, 2008
- Planned Parenthood of Bucks County LGBTQ Needs Assessment, 2007
- Project HOME North Philadelphia Needs Assessment, 2006
- Children's Hospital of Philadelphia Early Head Start Needs Assessment, 2003 and 2006
- Philadelphia Corporation for Aging Older Adults Needs Assessment, 2004

Non-Latino/a	123.5	109.7	70.1	90.0	
	942	2,031	582	3,860	

Notes:

Low birth weight is defined as an infant weighing less than 2500 grams (5.5 lbs.) at birth. The low birth weight rate is calculate per 1,000 live births.

White, Black, Asian and Other races include Latino/as. *Unknown race and ethnicity appear only for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 4. Average Annualized Percentage of Infants Born Prematurely by Race and Ethnicity, 2009-2012, in Temple Hospital Service Area

	Temple Hospital	Philadelphia County	Montgomery County	SEPA	
	Percentage Number	Percentage Number	Percentage Number	Percentage Number	
All Live Births	12.4 1,338	11.6 2,670	8.2 739	10.2 5,058	
Race/Ethnicity*					
White	10.2 174	8.9 554	7.9 516	8.6 2,192	
Black	14.3 787	13.9 1,523	12.1 106	13.6 1,955	
Asian	7.9 34	8.4 119	5.9 50	7.7 258	
Other	10.9 274	10.3 346	8.5 51	9.8 476	
Latino/a	10.6 316	10.3 410	8.4 60	9.7 591	
Non-Latino/a	13.0 983	11.7 2,158	8.2 673	10.2 4,325	

Notes:

Prematurity is defined as the birth of an infant before 37 weeks gestation. The percentage of infants born prematurely is calculated as a percentage of all live births that have birth certificate data on gestational age.

White, Black, Asian and Other races include Latino/as. *Unknown race and ethnicity appear only for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 5. Average Annualized Percentage of Women Receiving Late or No Pre-natal Care by Race and Ethnicity, 2009-2012, in Temple Hospital Service Area

	Temple Hospital	Philadelphia County	Montgomery County	SEPA	
	Percentage Number	Percentage Number	Percentage Number	Percentage Number	
All Live Births	50.3 5,037	46.2 9,939	25.7 2,260	35.8 17,051	
Race/Ethnicity*					
White	39.0 633	32.5 1,953	19.3 1,232	24.1 6,045	
Black	53.4 2,708	53.0 5,317	47.2 402	51.7 6,905	
Asian	45.7 182	41.9 556	26.5 222	33.0 1,073	
Other	52.2 1,253	51.7 1,645	58.9 344	51.3 2,373	
Latina	51.3 1,437	50.2 1,883	56.2 391	49.3 2,875	
Non-Latina	49.7 3,490	45.2 7,766	23.0 1,851	33.5 13,756	

Notes:

Late prenatal care is defined as not having a recorded prenatal care visit in the 1st or 2nd trimesters, or none at all.

The percentage of women receiving late or no pre-natal care is calculated as the percentage of all live births that have birth certificate data on receipt of prenatal

White, Black, Asian, and Other races include Latina/os. *Unknown race and ethnicity only appear for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 6. Average Annualized Infant Mortality Rate by Race and Ethnicity, 2009-2012, in Temple Hospital Service Area

	Temple Hospital	Philadelphia County	Montgomery County	SEPA	
	Rate per 1000 Number	Rate per 1000 Number	Rate per 1000 Number	Rate per 1000 Number	
All Live Births	9.8 107	9.3 215	4.8 44	7.3 365

Accidental Drug/Alcohol Poisoning	-	4.2 25	3.2 49	6.3 50	3.6 1,576	
Diabetes	66.6*	27.7 149	23.0 357	14.0 144	17.4 796	

Highlighted cells do not meet HP2020 Goal.

Note:

Mortality rates are calculated per 100,000 population.

Denominators to calculate age-adjusted rates to the Standard 2000 population derive from 2010 Census ZCTA data broken down into 19 age groups.

***Methodology Notes:**

Diabetes-related mortality data are derived from the multiple-cause-of-death files. Data include all mentions of diabetes on the death certificate, whether as an underlying or a multiple cause of death. Diabetes is approximately three times as likely to be listed as multiple cause of death than as underlying cause.

Overweight	157,800 35.3	377,800 33.0	216,100 35.7	1,057,800 34.4	
Obese	166,400 37.3	388,300 33.9	169,400 28.0	926,500 30.1	
Obese (age adjusted)*	36.5	34.0	37.9	29.3	
Healthy People 2020 Goal for Obesity is 30.6% of adults 20+. Highlighted cells do not meet HP2020 Goal. Overweight is defined as having a BMI of 25-29 and obese is defined as having a BMI of 30 or greater.					
Chronic Health Conditions					
Ever diagnosed with asthma	103,900 22.5	230,300 19.5	84,800 13.7	539,300 17.0	
Ever diagnosed with diabetes	70,600 15.3	181,500 15.4	65,000 10.6	401,500 12.7	
Ever diagnosed with high blood pressure	186,400 40.5	449,000 39.1	186,900 30.8	1,051,100 33.3	
High BP (age adjusted)*	35.9	33.5	24.9	27.4	
Not taking prescribed BP medication all or nearly all the time	12,100 7.6	28,000 7.3	5,800 3.6	46,300 5.2	
Not taking prescribed BP medication all or nearly all the time (age adjusted)*	6.0	7.4	5.8	6.7	
Healthy People 2020 Goal for adults with hypertension is 26.9% or fewer, and for adults with hypertension taking medication, 69.5% or more. Highlighted cells do not meet HP2020 goal.					

Notes:

*Age adjusted using the direct method and the 2000 U.S. standard million population.

Table 3. Personal Health Behaviors of Adults 18+, 2015

	Service Area	Philadelphia County	Montgomery County	SEPA	
	N	N	N	N	
	%	%	%	%	
Diet and Nutrition					
Fewer than four servings of fruits and vegetables in a typical day	374,900 85.1	922,800 81.4	446,100 73.0	2,369,100 77.1	
Ate fast food in the past week	204,500 44.1	457,300 38.6	189,300 30.5	1,087,700 34.3	
Cut a meal in the past year due to cost	16,700 16.1	36,400 11.6	7,400 3.7	61,500 6.6	

Physical Activity					
Did not exercise in the past month	120,700 26.3	271,600 23.0	124,900 20.2	685,400 21.7	
Exercised fewer than 3 days per week	131,800 50.4	558,500 47.3	316,400 51.1	1,526,800 48.4	
Comfortable visiting neighborhood outdoor space during the day	310,500 68.6	849,200 73.1	514,200 83.4	2,431,800 78.2	
Healthy People 2020 Goal for no leisuretime physical activity is 32.6%. Highlighted cells do not meet HP 2020 Goal.					

Cigarette Smoking					
Smokes cigarettes*	111,600 23.9	263,800 16.0	69,800 12.3	538,700 15.5	
Tried to quit smoking in past year (among smokers)	72,300 65.2	160,000 60.7	36,700 52.6	316,300 58.7	
Used e-cigarettes once or more in past month	31,200 6.7	86,700 7.3	41,300 6.7	217,900 6.9	
Someone smokes cigarettes inside home	75,200 16.2	180,800 15.3	49,300 7.9	372,100 11.7	
Healthy People 2020 Goal for cigarette smoking is 12%, Goal for smokers trying to quit is 80%, and goal for smokefree homes is 87%. Highlighted cells do not meet HP2020 Goal.					

Notes:

*Age adjusted using the direct method and the 2000 U.S. standard million population.

Table 5. Health Status and Service Needs of Older Adults 60+, 2015

	Service Area	Philadelphia County	Montgomery County	SEPA	
	N %	N %	N %	N %	
Health Status					
Excellent/Very Good/Good	63,200 62.8	205,000 70.7	155,800 83.2	689,900 79.3	
Fair/Poor	37,500 37.2	85,100 29.3	31,400 16.8	180,000 20.7	
Fallen in past year	21,900 21.7	63,500 21.9	41,800 22.3	191,500 22.0	
Activities of Daily Living					
At least one ADL limitation	18,400 18.1	46,300 15.9	17,300 9.2	105,400 12.1	
At least one IADL limitation	31,000 30.7	88,900 30.6	38,000 20.3	210,400 24.1	
ADL refers to Activities of Daily Living. IADL refers to Instrumental Activities of Daily Living.					
Mental Health and Social Isolation					
Signs of depression	21,100 23.3	48,200 18.2	11,900 6.7	97,400 12.1	
Talks to friends or relatives less than once a week	7,300 7.3	13,500 4.7	11,100 6.0	49,000 5.7	
Signs of depression is defined as having four or more depression symptoms on a ten item scale.					
Health Conditions					
Diagnosed with asthma	21,400 21.2	47,400 16.4	19,500 10.4	106,600 12.3	
Diagnosed with high blood pressure	71,600 71.3	191,400 66.1	91,600 49.1	493,600 56.8	
Diagnosed with diabetes	27,700 27.4	78,100 27.0	33,200 17.8	194,400 22.4	
Diagnosed with arthritis (2012)	60,300 59.3	348,000 29.1	153,600 24.6	440,100 52.8	
Wishes to Remain in Current Home					
Five years or less	21,900 24.8	59,900 22.8	35,400 20.3	162,500 20.4	
More than five years, less than ten	13,700 15.5	38,200 14.5	29,700 17.1	124,500 15.6	
Ten or more years	52,800 59.7	165,000 62.7	109,100 62.6	508,900 63.9	
Home Care & Other Services					
Paid for care in the home in past year	9,700 9.6	26,400 9.1	14,400 7.7	67,600 7.8	
Needs meal or food programs	7,100 7.9	18,200 7.0	2,500 1.4	25,000 3.1	
Needs transportation services	10,000 11.9	24,900 10.5	7,400 4.2	47,300 6.1

Table 6. Selected Child (Ages 0-17) Health Indicators, 2015

	Service Area	Philadelphia County	Montgomery County	SEPA	
	N %	N %	N %	N %	
Health Status					
Excellent/Very Good/Good	153,000 90.6	318,400 93.4	166,100 95.6	867,600 95.3	
Fair/Poor	15,800 9.4	22,500 6.6	7,700 4.4	42,700 4.7	
Diagnosed with asthma	40,100 23.6	73,500 21.5	25,600 14.7	167,500 18.4	
Access to Care					
No regular source of care	8,600 5.1	14,600 4.3	6,600 3.8	31,800 3.5	
Did not visit dentist in past year	36,100 21.4	69,500 20.4	27,700 16.0	161,000 17.7	
Did not receive needed dental care due to cost	7,200 4.2	16,900 4.9	8,000 4.6	35,000 3.8	
Body Mass Index (age 6+)					
Overweight	17,200 17.4	36,900 17.9	16,300 14.4	93,400 16.2	
Obese	34,900 35.2	65,700 32.0	21,300 18.8	123,500 21.4	
Overweight is calculated for children 6-17 years and is defined as scoring in the 85th-94th BMI-for-age percentile. Obese is calculated for children 6-17 years and is defined as scoring in the 95th of greater BMI-for-age percentile.					
Nutrition and Physical Activity					
Fewer than four servings of fruits and vegetables in a typical day	108,100 75.6	211,200 74.0	105,800 69.8	579,300 74.0	
Exercised fewer than 3 times per week (age 3+)	23,600 17.1	53,300 19.0	27,400 18.2	140,800 18.1	
Early Childhood Education					
Average number of hours/week in ECE setting (age 0-6)	15.2	14.4	14.1	13.6

APPENDIX E: SIGNIFICANCE TESTING

KEY

Green = the value for this variable for the CHNA area is significantly better than for the remainder of SEPA

Red = the value for this variable for the CHNA area is significantly worse than for the remainder of SEPA

**Comparison of the Temple Hospital Service area to Remainder of SEPA
Adults (18-64)**

KEY: NS = not statistically significant, .05 = statistically significant, .01 = highly statistically significant, .001 = very highly statistically significant. **Green** = significantly better than remainder of SEPA, **Red** = significantly worse than remainder of SEPA

Health Measure	Significance level
In fair or poor health	0.001
Ever diagnosed with high blood pressure	0.001
Ever diagnosed with diabetes	0.001
Ever diagnosed with asthma	0.001
Overweight (age 20+) (BMI percentile = 25 - 29.9)	0.001
Obese (age 20+) (BMI percentile = 30 or higher)	0.001
Ever diagnosed with a mental health condition	0.001
Receive treatment for a mental health condition	NS
Did not receive care in past year due to cost	0.01
Did not fill prescription in past year due to cost	0.05
Currently uninsured (ages 18-64)	0.001
Looked into buying insurance through healthcare.gov	0.05
Difficult to find a plan with affordable monthly premiums	0.001
Difficult to find a plan with affordable copays and deductibles	0.001
Does not have a regular source of healthcare	NS
No visits to healthcare provider in past year	NS
No dental visit in past year	0.001
Blood pressure not taken in past year	NS
No colonoscopy or sigmoidoscopy in past 10 years (50+)	0.001
No pap test in past 3 years (female 21-65)	NS
No breast exam in past year (female)	NS
No mammogram in past 2 years (female 50-74)	NS
No prostate screening in past year (male 45+)	0.001
Consumed fast food three or more times in past week	0.001
Fewer than 4 servings of fruits and vegetables per day	0.001
<3 days with 30 minutes of exercise/week,past month	NS
Currently smokes cigarettes	0.001
Tried to quit smoking in past year	0.01
Low social capital	0.001

Older Adults (60+)

In fair or poor health	0.001
Any ADL limitations	0.05
Any IADL limitations	0.05
Signs of depression (4+ symptoms in 10 point scale)	0.001

Children (0-17)

In fair or poor health	0.001
Overweight (BMI percentile = 85 – 94.9)	0.05
Obese (BMI percentile = 95 or higher)	0.001
Has no regular source of healthcare	0.05
Fewer than 4 servings of fruits and vegetables per day	NS
<3 days with 30 minutes of exercise/week,past month	NS
Examined by dentist in the past year	0.05
